Introduction to a Theory of Political Power in International Relations—Zlatko Isakovic 2019-07-16 This title was first published in 2000: An in-depth look at the definition of power. The writing is well crafted and very readable and comprises a range of theoretical deliberations and analysis of the numerous aspects of political power and its use in international relations. This includes an examination of idea and structure: population; territory; economics; military; the political system; ideology; and morale and its forms appearing in international relations in the past, present and future: influence and force. This, coupled with the author's gift for teasing out the pertinent points in an argument and using relevant and interesting examples, provides an excellent piece of comprehensive insight into a theory of political power.

The Transition From Command To Market Economies In East-central Europe—Sandor Richter 2019-09-10 Now that the euphoria over political change has died down, the formerly socialist countries of Eastern and Central Europe are facing an economic crisis. The contributors to this well-established annual publication consider the key factors affecting the economic transition process, analyzing possible strategies for successful reform including the use of "shock theory" to accelerate the process. As well as examining various country-specific problems, the authors explore the status of the Central European countries seeking integration with the European Economic Community, and ask whether all the former socialist countries might do well to adopt some of the economic development strategies used so successfully by the nations of Southeast Asia.

An Introduction to Contemporary International Law-Lung-chu Chen 2014-12-31 An Introduction to Contemporary International Law: A Policy-Oriented Perspective introduces the reader to all major aspects of contemporary international law. It applies the highly acclaimed approach developed by the New Haven School of International Law, holding international law as an ongoing process of authoritative decision-making through which the members of the world community identify, clarify, and secure their common interests. Unlike conventional works in international law, this book is organized and structured in terms of the process of decision making in the international arena, and references both classic historical examples and contemporary events to illustrate international legal processes and principles. Using contemporary examples, this Third Edition builds on the previous editions by contextualizing and dramatizing recent events with reference to seven features that characterize the New Haven School approach to international law: participants, perspectives, arenas of decision, bases of power, strategies, outcomes, and effects. This new edition highlights cutting-edge ideas in international law, including the right to self-determination, the evolution of Taiwan statehood, the expanding scope of international concern and the duty of states to protect human rights, the trend towards greater accountability for states and individual decision-makers under international law, and the vital role individual responsibility plays in the emerging field of international criminal law. It offers a new generation the intellectual tools needed to act as responsible citizens in a world community seeking human dignity and human security for all people.

The Energy Charter Treaty: An East-West Gateway for Investment and Trade - Thomas Walde 1996-07-25 The Energy Charter Treaty, initiated by the 1991 European Energy Charter and completed in December 1994, is an innovative major multilateral investment and trade treaty. The book has an introduction by Ruud Lubbers who, as the Dutch Prime Minister, played the key role in initiating the Energy Charter negotiations. It brings together contributions on the energy/investment background, the geopolitical context, the Energy Charter negotiations and the relevant specific topics of the Treaty (focusing on investment and trade, but also environment, competition and transit) by the key specialists on the subject, ranging from countries such as the US (which in the end decided not to join the Treaty) to Russia and Kazakhstan, including energy and investment specialists, international investment and commercial lawyers and arbitrators. The contributors include noted international energy/economic law authorities, but also key participants and observers of the Treaty negotiations. This book is intended to provide the first authoritative analysis of the background, negotiations and content of the Energy Charter Treaty and to provide support and guidance for subsequent negotiations and the difficult challenges involved in interpretation and application of the Treaty. It will be an essential tool for anybody working with the Energy Charter Treaty. The book contains in its annex the major documents of the Treaty: The 1991 European Energy Charter, the 1994 Treaty and its relevant Protocols, Annexes, Understandings and Final Act Declarations.

Introduction to International Relations-Robert Jackson 2015-12-01 Introduction to International Relations provides a concise and engaging introduction to the principal international relations theories and, uniquely, explores how theory can be used to analyse contemporary issues. Readers are introduced to the most important theories, encompassing both classical and contemporary approaches and debates. Throughout the text the authors encourage readers to consider the strengths and weaknesses of the theories presented, and the major points of contention between them. In so doing, the text helps the reader to build a clear understanding of how major theoretical debates link up with each other, and how the structure of the discipline of international relations is established. Jackson and Sørensen place a strong emphasis throughout on the relationship between theory and practice, carefully explaining how theories organise and shape our view of the world. A chapter is dedicated to key global issues and how theory can be used as a tool to analyse and interpret these issues. New to this edition are increased coverage of significant and current issues in global politics, including terrorism, religion, the environment, and war and peace.

A substantially updated chapter on the contemporary debates in international political economy, including capitalist diversity, models of development, and inequality. New end of chapter questions to encourage readers to link the key theories to practice, highlighting how theories matter.

A Short Introduction to International Law—Emmanuelle Tourme Jouannet 2014-11-13 In our globalised world the sources and actors of international law are many and its growth prolific and disorderly. International law governs the actions of states on matters as long-established as diplomatic immunity or as recent as the War on Terror, and it now impacts upon the lives of ordinary citizens in areas as diverse as banking and investment, public health and the protection of the environment. In this accessible introduction Emmanuelle Tourme Jouannet explains the latest developments in international law in the light of its history and culture, presenting it as an instrument both for dominance and for change that adjusts and balances the three pillars of the United Nations Charter: the prohibition of the use of force; economic, social and sustainable development; and human rights.

A Comparative Introduction to Political Science—Alan G. Smith 2016-04-08 When are legislators inclined to cast votes in cooperation with their parties, and when do they go their own way? When and why do nations contend with each other, and when are they more likely to cooperate? Thematicallly arranged around the interplay of contention and cooperation, A Comparative Introduction to Political Science encourages students to explore causal factors and consequences related to political phenomena to become knowledgeable and resourceful citizens of their nations and the world. Alan Smith covers how patterns of contention and cooperation—and the resulting government policies—may be affected by such factors as the surrounding political framework, the distribution of influence, and political motivation, including values as well as material interests. To expose students to the politics of specific nations, each chapter concludes with two country case studies that illuminate the theme of the chapter. Students emerge with a sense of what is going on in the world today. Pedagogically, the book employs careful sequencing of topics and concepts for clarity and to introduce politics in a natural, logical, synchronized way. At times Smith goes beyond sharp, night-and-day terminological distinctions to add accessible, ordinary language-based terminology that better captures the real-world spectrum between the extremes.
