Aino Kallas-Leena Kurvet-Käosaar 2019-04-08 The collection, first one ever on Aino Kallas in English, highlights her significance to the artistic and intellectual horizons of modernity of Finland and Estonia as well as those of Scandinavia and Europe. In the 1920s and 30s, Aino Kallas became an internationally renowned author and a selection of her work was translated into English. For her, participating in the immediate cultural debates in Estonia and Finland was a priority, yet her whole oeuvre is a negotiation between her more immediate contexts and the leading conceptual frameworks of aesthetics, geniality, knowledge, subjectivity, race, sexuality, nature, etc., circling in Europe at the end of the 19th and the beginning of the 20th century. Containing articles focusing on the question of female voice and echoes of feminist ecological thought in her fiction, a contrapuntal reading of her fiction and that of Isak Dinesen, her unknown manuscript ‘Batseba', the implications of existentialist thought for her work, Kallas' engagement in her cultural criticism and life writings with decadent modernism, issues of race and heredity, subjectivity and borders, travel, ageing, her interpretation of Goethe, and the iconography of Kallas, the collection features the work of today's leading Aino Kallas scholars in Finland and in Estonia.

Is Nature Enough?-John F. Haught 2006-05-04 Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as ‘naturalism’. Naturalism, in this context, denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on 'scientific' naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians and intellectually curious people in general.

Collision 2012  Dan Balz 2013-08-06 From the bestselling author of The Battle for America 2008 and longtime Washington Post correspondent, this inside view and analysis of the Obama-Romney presidential race in 2008 offers a bright young candidate triumphed on a theme of change and hope. Four years later an embattled President struggled against an apocalyptically divided and divisive Congress, a war that won’t end, and an economy that casts a dark penumbra over every spark of good news. His opponent, a well-heeled businessman who couldn’t seem to stand on his own business record, withstood unexpected and extreme opposition to capture the nomination of a party whose main platform and principles with which he was historically and fundamentally at odds. The 2012 Election brought to a running at a pace that was nearly as daunting as the infamous 2010 midterm shellacking and equally infamous Citizen United ruling, and delivered drama and tension as the Republicans tried to reconcile the factions at war within their party and Democrats faced the tsunami of super Pac money flooding local and regional elections. As with his last book, The Battle for America 2008, Washington Post correspondent Dan Balz uses a combination of superb sources and long, deep reporting to piece together facts and individual stories from this singular and often-overlooked aspect of World War II history. As mothers, wives, daughters, and sisters, female Polish forced laborers faced a unique set of challenges and often unspeakable conditions because of their gender. Required to sew a large letter “P” onto their jackets, thousands of women, some as young as age 12, were taken from their homes in Poland and forced to work for the Reich for months and years on end. In this important contribution to World War II history, Knab explains how it all happened, from the beginning of occupation in Poland to liberation: the roundups; the horrors of transit camps; the living and working conditions of Polish women in agriculture and industry; and the anguish of sexual exploitation and forced abductions—all under the constant threat of concentration camps. Knab draws from documents, government and family records, rare photos, and most importantly, numerous victim accounts, letters and trial testimonies present an unflinching, detailed portrait of the lives of female Polish laborers, finally giving these women a voice and bringing to light to the atrocities that they endured.

Robinson Crusoe: Lieve Spasa 2016-01-07 Robinson Crusoe explores Defoe’s story, the legend it captured, the universal desire which underlies the myth and a range of modern re-writings which reveal a continued fascination with the problematic character of this narrative. Whether envisaged as an heroic rejection of the old world order, a piece of pre-colonialist propaganda or a tale raising archetypal problems of ‘otherness’ and ‘inequality’, the mythic value of Crusoe has become a pretext over many centuries for an examination of some of the fundamental problems of existence. This collection of essays examines, from a wide range of critical and philosophical perspectives, the cultural manifestations of Robinson Crusoe in different centuries, in different media, in different genres.

The Leprechauns of Software Engineering: Laurent Bossavit 2015-06-28 The software profession has a problem, widely recognized but which nobody seems willing to do anything about; a variant of the well known “telephone game,” where some trivial rumor is repeated from one person to the next until it has become distorted beyond recognition and blown up out of all proportion. Unfortunately, the objects of this telephone game are generally considered cornerstone truths of the discipline, to the point that their acceptance now seems to hinder further progress. This book takes a look at some of those “ground truths” the claimed 10x variation in productivity between developers; the “software crisis”; the cost-of-change curve; the “cone of uncertainty”; and more. It assesses the real weight of the evidence behind these ideas - and confronts the scary prospect of moving the state of the art forward in a discipline that has had the ground kicked from under it.

The Annoying Difference: Peter Hervik 2011-07-30 The Muhammad cartoon crisis of 2005–2006 in Denmark caught the world by surprise as the growing hostilities toward Muslims had not been widely noticed. Through the methodologies of media anthropology, cultural studies, and communication studies, this book brings together more than thirteen years of research on three significant historical media events in order to show the drastic changes and emerging fissures in Danish society and to expose the politicization of Danish news journalism, which has consequences for the political representation and everyday lives of ethnic minorities in Denmark.

Missing Persons: Bruce Piasecki 2015-02-09 “An unpretentious, tactical, and sure-footed examination of the events that shaped his own life.” – Jay Parini, author of the best-selling historical novel, The Last Station Bruce Piasecki’s book on business strategy Doing More With Less: the New Way to Wealth, was an immediate success, becoming a New York Times, USA Today, and Wall Street Journal bestseller. Indeed, Doing More With Less is not just a clever book title; it explains the core philosophy of a man, who propelled from an impoverished and fatherless childhood, became an internationally, sought-after resource for the world’s largest corporations— from Toyota and Wal-Mart to Shell and Suncor Energy. Those who helped and shaped Dr. Piasecki are the focus of his latest work Missing Persons: A Life of Unexpected Influences. Indeed, in this set of 70 vignettes Piasecki channels his poetic side - a side that was first noticed at Cornell when his little-known book of poems was published under the title Stray Prayers in 1973. The memoir, one part autobiogaphy, one part creative non-fiction and written in vignette form, recounts the author’s formative relationships and experiences with intimacy and longing. Meet his mother, and father, his interracial brothers and sisters, his early and late business partners, his lovers, his daughter and his wife. It is told in a unique third person narrative that provides intrigue for the reader as they follow the protagonist through loss, passion, self-invention, a litany of fears and dreams - each revealed in eloquent prose. Through his uniquely informed perspective, Bruce allows us to understand the power of memory and how it influences us. The simplicity that made Doing More With Less a bestseller makes this new work not only compelling, but also life-affirming. Missing Persons explores the meaning and power of memory, and offers an opportunity for the reader to pause, reflect, and recount the myriad of influences in their own lives.
