Real Estate Investor's Guide -C. M. Middleton 2016-08-06 Learn How You Can Get Into Real Estate Investing, All You Have To Do Is Read This Book, and TAKE ACTION! This book contains proven steps and strategies on how you can get into real estate investing, and grow your wealth. This book that I have written is designed specifically for beginners who have no prior knowledge about the real estate market. While you may not be aware of it, people are making a fortune on the real estate market and they are doing so because of the opportunities offered. No longer is banking investment thought of as being the best bet. Interest rates are falling and people are beginning to cotton onto the fact that if they want the best return for their money, they need to look elsewhere.At the time of writing this book, I have established myself sufficiently to be able to give up work. However, once you get onto the real estate ladder, it's unlikely that you will want to get off it. It's addictive and it's fun, but it's also a lot of hard work and you need to do your homework. Don't expect money for nothing because real estate investment is hard work. What drew me to it was the fact that I had money accumulated in the property I bought for my family. This equity or value of the home seemed to be sitting doing nothing and when I looked into the potential, I was surprised at just how far that money could go in securing my future. Remember that all the information that you are about to read is going to be useless, if you don't take action. You can be a real estate expert, but you will not make any money if you don't implement what you learn. Taking action is what leads to profits and a chance at the financial freedom you dream about, and not taking action is the number one reason for failure.This is the beginners real estate investors guide on investing in real estate, real estate investing for dummies, real estate flipping, real estate income, rental income, buying and selling houses, Here Is A Preview Of The Specifics Of What You'll Learn... The Little Book of Investing Like the Pros-Joshua Pearl 2020-04-07 As you have probably noticed, there are quite a few investing books out there. Many of them were written by some of the world's greatest investors. So, why should you read our book? Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. The Little Book of Investing Like the Pros was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices. Our practical approach is designed to help demystify the investing process, which can be intimidating. This training will help set you apart from others who are largely flying blind. Pilots require extensive training before receiving a license. Doctors must graduate medical school, followed by a multi-year residency. Even those providing professional investment advice require certification. But, anyone can buy a stock without any training whatsoever. While buying stocks on a hunch and a prayer may not endanger your life, it can certainly put your finances at risk.

Investors' Guide to Farmland-Greyson S. Colvin 2012-05-01 Everyone has to eat to survive. The production of almost all food can be traced back to farmland in some way. Demand is growing for farmland as the world's population and global needs for food are rising. The supply of farmland is not changing, thus creating a severe imbalance in the supply of farmable land and demand for food. The world's population is expected to grow from 7 billion to over 9 billion by 2050. Over the same time period, food production must double. Global grain supplies are already at record low levels. If the US stopped producing corn, it would run out in less than 30 days and set off a domino effect that would bring the world to its knees. How can one capitalize on the increased global protein consumption and demand for food? An investment in farmland will provide a steady stream of income and capital gains due to the increasing global demand for agricultural commodities and limited supply of global arable land. The Investors' Guide to Farmland will guide you through the rational for investment in farmland, understanding the characteristic of farmland, and why it should become part of your portfolio.
