The Passover Seder-Ruth Fredman Cernea 1995-01-01
Through a detailed anthropological and symbolic analysis, Cernea shows why the Seder continues to be a fundamental part of the process by which Jewich society creates and defines itself.

The Meal-Harlan Walker
2002 This volume of papers presented at the Oxford Symposium on Food and Cookery follows the pattern of previous collections. The Symposium entitled Food and Memory was held in September 2000 at St Antony's College, Oxford under the joint chairmanship of Alan Davidson and Theodore Zeldin.
Key Texts in American Jewish Culture - Jack Kugelmass
2003 Key Texts in American Jewish Culture expands the frame of reference used by students of culture and history both by widening the "canon" of Jewish texts and by providing a way to extrapolate new meanings from well-known sources. Contributors come from a variety of disciplines, including American studies, anthropology, comparative literature, history, music, religious studies, and women's studies. Each provides an analysis of a specific text in art, music, television, literature, homily, liturgy, or history. Some of the works discussed, such as Philip Roth's novel *Counterlife*, the musical *Fiddler on the Roof*, and Irving Howe's *World of Our Fathers*, are already widely acknowledged components of the American Jewish studies canon. Others-such as *Bridget Loves Bernie*, infamous for the hostile reception it received among American Jews+ may be considered "key texts" because of the controversy they provoked. Still others, such as *Joshua Liebman's Piece of Mind* and the radio and TV sitcom *The Goldbergs*, demonstrate the extent to which American Jewish culture and mainstream American culture intermingle with and borrow from each other.

Judaism Viewed from Within and from Without - Harvey E. Goldberg
2012-02-01 Judaism Viewed from Within and from Without presents three themes. The first applies anthropological analyses to classic textual material in Judaism, the second presents studies of different expressions of Jewish life in America, while the third portrays varieties of Judaism among different cultural groups in contemporary Israel.

Life in Citations - Ruth Tsoffar
2019-09-26 In her latest book, Life in Citations: Biblical Narratives and
Contemporary Hebrew Culture, Ruth Tsoffar studies several key biblical narratives that figure prominently in Israeli culture. Life in Citations provides a close reading of these narratives, along with works by contemporary Hebrew Israeli artists that respond to them. Together they read as a modern commentary on life with text, or even life under the rule of its verses, to answer questions like How can we explain the fascination and intense identification of Israelis with the Bible? What does it mean to live in such close proximity with the Bible, and What kind of story can such a life tell?

Matzoh Ball Gumbo - Marcie Cohen Ferris 2009-08-05
Since early colonial times in America, Jewish southerners have been tempted by delectable regional foods. Because some of these foods - including pork and shellfish - have been traditionally forbidden to Jews by religious dietary laws, southern Jews face a special predicament. In a culinary journey through the Jewish South, Arkansas native Marcie Cohen Ferris explores how southern Jews embraced, avoided, and adapted southern food and, in the process, have found themselves at home. From colonial Savannah and Charleston to Civil War era New Orleans and Natchez, from New South Atlanta to contemporary Memphis and the Mississippi and Arkansas Deltas, examines the expressive power of food throughout southern Jewish history. Jews in the South reinvented traditions as they adjusted to living in a largely Christian world where they were bound by regional rules of race, class, and gender. In some cases, Jews merely adjusted their eating habits to match those of their new neighbors. In other cases, they created a new cuisine that revealed a merging of the many cultures they encountered in the New World. At the dining table, Jewish southerners created a distinctive religious expression that reflects the evolution of southern Jewish life. Featuring a trove of photographs, Matzoh Ball Gumbo also includes anecdotes, oral histories, and
more than thirty recipes to try at home. Ferris's rich tour of southern Jewish foodways helps us answer the question, "What does it mean to be both southern and Jewish?"

The Study of Children in Religions—Susan B. Ridgely
2011-09 Research in religious studies has traditionally focused on adult subjects since working with children presents significantly more challenges to the researcher, such as getting the research protocol passed by the Internal Review Board, obtaining permission from parents and schools, and figuring out how to make sense of young worldviews. The Study of Children in Religions provides scholars with a comprehensive source to assist them in addressing many of the issues that often stop researchers from pursuing projects involving children. This handbook offers a broad range of methodological and conceptual models for scholars interested in conducting work with children. It not only illuminates some of the legal and ethical issues involved in working with youth and provides guidance in getting IRB approval, but also presents specific case studies from scholars who have engaged in child-centred research and here offer the fruits of their experience. Cases include those that use interviews and drawings to work with children in contemporary settings, as well as more historically focused endeavours to use material culture such as Sunday school projects or religious board games to study children's religious lives in past eras. The Study of Children in Religions offers concrete help to those who wish to conduct research on children and religion but are unsure of how to get started or how to frame their research. Adequate Food for All: Wilson G. Pond 2009-02-12
Food is the sustenance of life. But while we understand that a secure supply of food has been affected by many factors over the course of history, we do not often allow ourselves to entertain the idea that a lack of adequate food worldwide is a very real and dangerous possibility. While soil degradation, water distribution, climate change, population growth, and environmental issues are of serious concern, the ultimate expectation is that humankind will survive and even prevail simply because it always has, through human ingenuity and continued advances in science and technology. Adequate Food for All: Culture, Science, and Technology of Food in the 21st Century looks at those factors threatening to compromise food production and distribution. It examines the myriad influences on food security today as well as the human responses to them. Taking an interdisciplinary approach that involves authors of diverse expertise, this volume – Discusses our evolving understanding of what is critical to good nutrition and health Examines the role of religion and faith in food choices, as well as the influence of culture and customs Explores issues of obesity and related diseases as well as diseases of nutrient deficiencies Describes the most dangerous threats to sustainable food production Lays out viable solutions through conservation, technology, and cultural adaptation Ultimately, this volume challenges readers to garner a deeper understanding needed to develop solutions that truly change the future rather than postpone the inevitable. Recognition of food as a universal need of people everywhere may be a point of union for the human spirit. The future holds opportunities and imperatives that must be faced, perhaps none more
important than how we come together to keep the world fed. Adequate Food for All: Culture, Science, and Technology of Food in the 21st Century covers many of the issues involved in meeting this goal.

**Almost Englishmen**- Ruth Fredman Cernea 2007

Before the Second World War, two golden 'promised lands' beckoned the thousands of Baghdadi Jews who lived in Southeast Asia: the British Empire, on which 'the sun never set,' and the promised land of their religious tradition, Jerusalem. Almost Englishmen studies the less well-known of these destinations. The book combines history and cultural studies to look into a significant yet relatively unknown period, analyzing to full effect the way Anglo culture transformed the immigrant Bagdhadi Jews. England's influence was pervasive and persuasive: like other minorities in the complex society that was British India, the Baghdadis gradually refashioned their ideology and aspirations on the British model. The Jewish experience in the lush land of Burma, with its lifestyles, its educational system, and its internal tensions, is emblematic of the experience of the extended Bagdhadi community, whether in Bombay, Calcutta, Shanghai, Singapore, or other ports and towns throughout Southeast Asia. It also suggests the experience of the Anglo-Indian and similar 'European' populations that shared their streets as well as the classrooms of the missionary societies' schools. This contented life amidst golden pagodas ended abruptly with the Japanese invasion of Burma and a horrific trek to safety in India and could not be restored after the war.

Employing first-person testimonies and recovered documents, this study illuminates this little known period in imperial and Jewish histories.

**The Journal of Indo-judaic Studies**- 2002
Using a variety of anthropological approaches, the authors illustrate how the Jewish identity has persisted in the United States despite great subcultural variation and a wide range of adaptations. Within the various essays, attention is given to both mainstream Jews and to the Hasidim, Yemenites, Indian Sephardim, Soviet Emigres, and Jews for Jesus. Institutions such as the family, the school, and the synagogue, are considered through techniques of participation/observation and in archeological research. Persistence and Flexibility provides a means of viewing the Jewish community through the prism of key events, or rituals, and symbols.

Reading Matter-Arthur Asa Berger 2008-10-01 To be civilized involves, among other things, making, using, and buying objects. Although speculation on the significance of objects often tends to be casual, there are professionals--anthropologists, historians, semioticians, Marxists, sociologists, and psychologists--who analyze material culture in a systematic way and attempt to elicit from it reliable information about people, societies, and cultures. One
reason that analyzing objects has been problematical for scholars is the lack of a sound methodology governing multidisciplinary research. Reading Matter addresses this problem by defining a comprehensive set of methodological approaches that can be used to analyze and interpret material culture and relate it to personality and society. Berger offers discussions of the main concepts found in semiotic, historical, anthropological, psychoanalytic, Marxist, and sociological analysis. He provides practical descriptions of the working methods of each discipline and demarcates their special areas of investigation. Berger's lively discussions include a wealth of illustrative examples that help to clarify the complex and often difficult theories that underlie interpretations of material culture. In the second part of his analysis, Berger uses these disciplines to investigate one subject--fashion and an important aspect of fashion, blue jeans, and what the author calls the "denimization" phenomenon. Here he shows how different methods of "reading" material culture end up with different perspectives on things--even when they are dealing with the same topic. The author's focus is on the material culture of post-literate societies and cultures, both contemporary and historical. This comparative approach enables the reader to trace the evolution of objects from past to present or to see how American artifacts spread to different cultures, acquiring a wholly new meaning in the process. Reading Matter is an important contribution to the study of popular culture and social history. It will be of interest to sociologists, anthropologists, and cultural historians. Arthur Asa Berger is professor emeritus of broadcast and electronic communication arts at San Francisco State University and series editor of Transaction's Communication and Mass Culture and Humor Studies series. He is the author of many books including Manufacturing Desire and Agitpop.

The Lord's Table-Gillian Feeley-Harnik 2017-01-30
Focusing on the imagery of the Last Supper, The Lord's Table is a provocative study of Jewish-Gentile relations through their symbolic rituals in the first century A.D. The author argues that the Last Supper, representing the crucifixion and resurrection of Jesus, was a reinterpretation of many different kinds of covenant meals, in scripture and in practice, that focused primarily on the Passover. By following the overall pattern of the Passover, yet inverting every critical element, the early church transformed the meaning of the meal and the sacrifice on which it was based into something quite different. Through anthropological and literary analysis, The Lord's Table brings to light how a ritual so intrinsic to modern Christian life was once so controversial and revolutionary.

The Anthropology of Western Religions-Murray J. Leaf 2014-05-21 The world’s “great” religions depend on traditions of serious scholarship, dedicated to preserving their key texts but also to understanding them and, therefore, to debating what understanding itself is and how best to do it. They also have important public missions of many kinds, and their ideas and organizations influence many other important institutions, including government, law, education, and kinship. The Anthropology of Western Religions: Ideas, Organizations, and Constituencies is a comparative survey of the world’s major religious traditions as professional enterprises and, often, as social movements. Documenting the principle ideas behind Western religious traditions from an anthropological perspective, Murray J. Leaf demonstrates how these ideas have been used in building internal organizations that mobilize or fail to mobilize external support.

American Book Publishing Record- 2005
Food and Judaism - Studies in Jewish Civilization 15 2005

Food is not simply a popularly imagined and well-known manifestation of Jewish culture. For Jews, food has been a means of exclusion, persecution, and assimilation by the larger society. Equally important, it has been an instrument of community, reparation, and renewal of identity. Food and Judaism presents a wide range of research on the history and interpretation of Jewish food practices and meanings. This volume covers a comprehensive array of topics, including American regional manifestations of food practices from little-known Jewish communities in cities such as contemporary Brighton Beach and Memphis; a social history of Jewish food in America by the renowned expert on Jewish food Joan Nathan; and an examination of how the American food industry appealed to early twentieth-century Jews. Several discussions of the religious meaning and personal advantages of following a vegetarian lifestyle are considered from biblical and historical perspectives. A rescued cookbook text from the Theresienstadt concentration camp is juxtaposed with an examination of how garlic in Jewish cooking served as an anti-Semitic caricature in early modern Europe. Historical perspectives are also provided on the use of separate dishes for milk and meat, the sanctification of Hasidic foods in Eastern Europe, and “mystical satiation” as found in the medieval Kabbalah.

Anthropological Abstracts 9/2010 - Ulrich Oberdiek

2014-01-08 Anthropological Abstracts (AA) is a reference journal published once a year in print, but also under www.anthropology-online.de and announces - in English language - most publications in the field of cultural/social
anthropology published in the German language area (Austria, Germany, Switzerland). Since many of these publications have been written in German, and most German publications are not included in the major English language abstracting services, Anthropological Abstracts offers a convenient source of information for anthropologists and social scientists in general who do not read German, to become aware of anthropological research and publications in German-speaking countries. Included are journal articles, monographs, anthologies, exhibition catalogs, yearbooks, etc. Most abstracts are authored by the editor, others are specified accordingly. This journal is edited by Ulrich Oberdiek since 1993 (formerly: Abstracts in German Anthropology; since 2002: Anthropological Abstracts).

**Factions, Friends and Feasts**
Jeremy Boissevain† 2013-03-30
Drawing on field research in Malta, Sicily and among Italian emigrants in Canada, this book explores the social influence of the Mediterranean climate and the legacy of ethnic and religious conflict from the past five decades. Case studies illustrate the complexity of daily life not only in the region but also in more remote academe, by analysing the effects of fierce
family loyalty, emigration and the social consequences of factionalism, patronage and the friends-of-friends networks that are widespread in the region. Several chapters discuss the social and environmental impact of mass tourism, how locals cope, and the paradoxical increase in religious pageantry and public celebrations. The discussions echo changes in the region and the related development of the author's own interests and engagement with prevailing issues through his career.

Order and Disorder - Keebet von Benda-Beckmann
2008-02-01 Disorder and instability are matters of continuing public concern. Terrorism, as a threat to global order, has been added to preoccupations with political unrest, deviance and crime. Such considerations have prompted the return to the classic anthropological issues of order and disorder. Examining order within the political and legal spheres and in contrasting local settings, the papers in this volume highlight its complex and contested nature. Elaborate displays of order seem necessary to legitimate the institutionalization of violence by military and legal establishments, yet violent behaviour can be incorporated into the social order by the development of boundaries, rituals and established processes of conflict resolution. Order is said to depend upon justice, yet injustice legitimates disruptive protest. Case studies from Siberia, India, Indonesia, Tibet, West Africa, Morocco and the Ottoman Empire show that local responses are often inconsistent in their valorization, acceptance and condemnation of disorder.

A Companion to the Anthropology of Religion - Janice Boddy 2015-12-14 A Companion to the Anthropology of Religion presents a collection of original, ethnographically-informed essays that explore the variety of beliefs, practices, and
religious experiences in the contemporary world and asks how to think about religion as a subject of anthropological inquiry. Presents a collection of original, ethnographically-informed essays exploring the wide variety of beliefs, practices, and religious experiences in the contemporary world. Explores a broad range of topics including the perspectivism debate, the rise of religious nationalism, reflections on religion and new media, religion and politics, and ideas of self and gender in relation to religious belief. Includes examples drawn from different religious traditions and from several regions of the world. Features newly-commissioned articles reflecting the most up-to-date research and critical thinking in the field, written by an international team of leading scholars. Adds immeasurably to our understanding of the complex relationships between religion, culture, society, and the individual in today's world.

**Consuming Habits** - Jordan Goodman 2014-04-08

Covering a wide range of substances, including opium, cocaine, coffee, tobacco, kola, and betelnut, from prehistory to the present day, this new edition has been extensively updated, with an updated bibliography and two new chapters on cannabis and khat. Consuming Habits is the perfect companion for all those interested in how different cultures have defined drugs across the ages. Psychoactive substances have been central to the formation of civilizations, the definition of cultural identities, and the growth of the world economy. The labelling of these substances as 'legal' or 'illegal' has diverted attention away from understanding their important cultural and historical role. This collection explores the rich analytical category of psychoactive substances from challenging historical and anthropological perspectives.

**Food for Thought** - Simona Stano 2021-10-20

This volume offers new insights into food and culture. Food habits, preferences, and taboos are partially regulated by...
ecological and material factors - in other words, all food systems are structured and given particular functioning mechanisms by specific societies and cultures, either according to totemic, sacrificial, hygienic-rationalist, aesthetic, or other symbolic logics. This provides much “food for thought”. The famous expression has never been so appropriate: not only do cultures develop unique practices for the production, treatment and consumption of food, but such practices inevitably end up affecting food-related aspects and spheres that are generally perceived as objectively and materially defined. This book explores such dynamics drawing on various theoretical approaches and analytical methodologies, thus enhancing the cultural reflection on food and, at the same time, helping us see how the study of food itself can help us understand better what we call “culture”. It will be of interest to anthropologists, philosophers, semioticians and historians of food.

  - **Sociology and the World's Religions** - M. Hamilton 1998-08-09
  
  Sociological and related studies of systems of religion tend to be fragmented. This book brings together and assesses a diverse range of substantive sociological, anthropological and social-psychological scholarship dealing with the broad spectrum of religious belief, experience and behaviour from the work of anthropologists on the religions of tribal and pre-industrial peoples to explorations of the origins, development and impact of the great world religions. The book will have particular appeal not only in the fields of sociology, social anthropology, but also religious studies.

  - **Jewish Passages**
"Goldberg's breadth of knowledge is particularly impressive. Here is a scholar who has read everything, and has produced a rich, first-rate book that is both comprehensive and accessible, making Jewish customs meaningful even to non-specialists. A scholarly achievement that is also a great bar-mitzvah gift, with tremendous value for anyone in Jewish Studies including rabbis and members of synagogue study groups."—Jack Kugelmass, Irving and Miriam Lowe Professor and Director, Jewish Studies Program at Arizona State University

"Sweeping in its reach and richly informative in its details. Jewish Passages offers a treasury of wonderfully interesting information. This is a work that will not be lost."

—Samuel C. Heilman, author of When a Jew Dies
