**Happiness and Holiness**-Denise Inge 2008-09-01 The 17th century writer Thomas Traherne is increasingly being recognised and studied as a theologian as well as a poet. The discovery, in 1997, announced by the author of this volume, of five new prose works and a poetic work has given huge impetus to the study of Traherne in literature and theology. This affordable, concise introduction to Traherne's life and work concerns Traherne primarily as a theologian and places him in an historical and intellectual context he has thus far lacked. It demonstrates his distinctive contribution to Anglican theology. Consisting of a 10,000 word introductory essay and biography it is followed by extracts from Traherne's work under the following headings: Creatures and Powers, Holiness and Happiness, Sin and Salvation, Christian Liberty, Advice on Ministry, and Prayers.

The book of Proverbs is full of practical wisdom, and its instruction for living has been long tried and proven. David Atkinson's commentary wonderfully illuminates the ancient cultural and religious background of the discourses and sayings of Proverbs, bringing the wisdom of Proverbs into conversation with the wisdom of God now more fully displayed in Christ.

Coleridge, Philosophy and Religion - Douglas Hedley 2000-06-22

Coleridge's relation to his German contemporaries constitutes the toughest problem in assessing his standing as a thinker. For the last half-century this relationship has been described, ultimately, as parasitic. As a result, Coleridge's contribution to religious thought has been seen primarily in terms of his poetic genius. This book revives and deepens the evaluation of Coleridge as a philosophical theologian in his own right. Coleridge had a critical and creative relation to, and kinship with, German Idealism. Moreover, the principal impulse behind his engagement with that philosophy is traced to the more immediate context of English Unitarian-Trinitarian controversy of the eighteenth and nineteenth centuries. The book re-establishes Coleridge as a philosopher of religion and as a vital source for contemporary theological reflection.

The Man From Empire - Dan Melson 2013-09-22

Instead everything she's ever been taught is called into question. The enemy is older than Rome, hiding on Earth, and not fully in control of powers that could destroy the planet. But in the middle of strife and risk, there is also opportunity - and Grace's feet are set on a path to become more than she ever dreamed.

The Rediscovery of the Wild - Peter H. Kahn 2013

We often enjoy the benefits of connecting with nearby, domesticated nature -- a citypark, a backyard garden. But this book makes the provocative case for the necessity of connecting with wild nature -- untamed, unmanaged, not encompassed, self-organizing, and unencumbered andunmediated by technological artifice. We can love the wild. We can fear it. We are strengthened andnurtured by it. As a species, we came of age in a natural world far wilder than today's, and much ofthe need for wilderness still exists within us, body and mind. T he Rediscovery of the Wild considers ways to engage with the wild, protect it, and recover it -- for our psychological and physical well-being and to flourish as a species. The contributors offer a rangeof perspectives on the wild, discussing such topics as the evolutionary underpinnings of our needfor the wild; the wild within, including the primal passions of sexuality and aggression; birding as a portal to wildness; children's fascination with wild animals; wildness and psychological healing; the shifting baseline of what we consider wild; and the true work of conservation. The hardcover edition does not include a dust jacket.

On Having No Head - Douglas Edison Harding 2013-07

Children of God - Edmund Newey 2016-05-23

Children of God uncovers the significant, but largely unnoticed, place of the child as a prototype of human flourishing in the work of four authors spanning the modern period. Shedding new light on the role of the child figure in modernity, and in theological responses to it, the book makes an important contribution to the disciplines of historical theology, theology and literature and ecumenical theology. Through a careful exploration of the continuities and differences in the work of Thomas Traherne, Jean-Jacques Rousseau, Friedrich Schleiermacher and Charles Péguy, it traces the ways in which their distinctive responses to human childhood structured the broader pattern of their theology, showing how they reached beyond the confines of academic
theology and exercised a lasting influence on their literary and cultural context.

**Reclaiming Adoption**-John Piper 2010-12-09 One of the ambitious dreams that Reclaiming Adoption and its authors share with the Apostle Paul is that when Christians hear the word adoption, they will think first about their adoption by God. As it now stands, Christians usually think first about the adoption of children. Reclaiming Adoption sets out to change this situation by providing breathtaking views of God's love for and delight in His children - views that will free you to live boldly in this world from God's acceptance, not in order to gain it. Reclaiming Adoption begins by examining Jesus' Parable of the Prodigal Son because it ultimately puts God the Father's love on display - a love that embraces the younger son with uninhibited joy (Luke 15:20) and goes out to entreat the self-righteous older son to come join the celebration (Luke 15:28). The book is premised on the belief that behind the Parable of the Prodigal Son(s) is Scripture's teaching on adoption. The story of the Bible is that God the Father sent his only true and eternal Son on a mission, and that mission was to bring many wayward and rebellious sons home to glory (Hebrews 2:10) in order to adopt them into His family. That is the Story behind the story of the Prodigal Sons. It is the only story that gives our stories any meaning or significance. Dan Cruver and his co-authors are convinced that if Christians learn to first think about their adoption by God, and only then about the adoption of children, they will enjoy deeper communion with the God who is love, and experience greater misisonal engagement with the pain and suffering of this world. That's what this book is about. What the orphan, the stranger, and the marginalized in our world need most is churches that are filled with Christians who live daily in the reality of God's delight in them. Reclaiming Adoption can transform the way you view and live in this world for the glory of God and the good of our world's most needy.

The Buried Book - David Damrosch 2007-12-26 Adventurers, explorers, kings, gods, and goddesses come to life in this riveting story of the first great epic—lost to the world for 2,000 years, and rediscovered in the nineteenth century. Composed by a poet and priest in Middle Babylonia around 1200 BCE, The Epic of Gilgamesh foreshadowed later stories that would become as fundamental as any in human history, The Odyssey and the Bible. But in 600 BCE, the clay tablets that bore the story were lost—buried beneath ashes and ruins when the library of the wild king Ashurbanipal was sacked in a raid. The Buried Book begins with the rediscovery of the epic and its deciphering in 1872 by George Smith, a brilliant self-taught linguist who created a sensation when he discovered Gilgamesh among the thousands of tablets in the British Museum’s collection. From there the story goes backward in time, all the way to Gilgamesh himself. Damrosch reveals the story as a literary bridge between East and West: a document lost in Babylonia, discovered by an Iraqi, decoded by an Englishman, and appropriated in novels by both Philip Roth and Saddam Hussein. This is an illuminating, fast-paced tale of history as it was written, stolen, lost, and—after 2,000 years, countless battles, fevered digs, conspiracies, and revelations—finally found.

Rediscovery Of India, The (pb)-Desai

Atlas of a Lost World-Craig Childs 2019-04-09 In Atlas of a Lost World, Craig Childs upends our notions of where these people came from and who they were. How they got here, persevered, and ultimately thrived is a story that resonates from the Pleistocene to our modern era. The lower sea levels of the Ice Age exposed a vast land bridge between Asia and North America, but the land bridge was not the only way across. Different people arrived from different directions, and not all at the same time. The first explorers of the New World were few, their encampments fleeting. The continent they reached had no people but was inhabited by megafauna-mastodons, giant bears, mammoths, saber-toothed cats, five-hundred-pound panthers, enormous bison, and sloths that stood one story tall. The first people were hunters-Paleolithic spear points are still encrusted with the proteins of their prey-but they were wildly outnumbered and many would themselves have been prey to the much larger animals. Atlas of a Lost World chronicles the last millennia of the Ice Age, the violent oscillations and retreat of glaciers, the clues and traces that document the first encounters of early humans, and the animals whose presence governed the humans' chances for survival. A blend of science and personal narrative reveals how much has changed since the time of mammoth hunters, and how little. Across unexplored landscapes yet to be peopled, readers will see the Ice Age, and their own age, in a whole new light.

The Rediscovery of North America-Barry Lopez 2011-09-14 Five hundred years ago an Italian whose name, translated into English, meant Christopher Dove, came to America and began a process not of discovery, but incursion -- "a ruthless, angry search for wealth" that continues to the present day. This provocative and superbly written book gives a true assessment of Columbus's legacy while taking the first steps toward its redemption. Even as he draws a direct line between the atrocities of Spanish conquistadors and the ongoing pillage of our lands and waters, Barry Lopez challenges us to adopt an ethic that will make further depredations impossible. The Rediscovery of North America is a ringingly persuasive call for us, at long last, to make this country our home.

Rediscovering Travel: A Guide for the Globally Curious-Seth Kugel 2018-11-13 A revolutionary philosophy for rookie and veteran travelers alike, Rediscovering Travel "gets to the heart of why we travel" (Matt Kepnes, “Nomadic Matt”). Having captivated millions during his tenure as the New York Times's “Frugal Traveler,” Seth Kugel is one of our most internationally beloved travel writers. With the initial publication of Rediscovering Travel, he took the corporate modern travel industry to task, determined to reignite an age-old sense of adventure that has virtually
been vanquished by the spontaneity-obliterating likes of Google Maps, TripAdvisor, and Starwood points. Now in travel-friendly paperback, this “funny, inspiring and well-crafted” companion (Associated Press) reveals how to make the most of new apps and other digital technologies without being shackled to them. Writing for the tight-belted tourists and the first-class flyer, the eager student and the comfort-seeking retiree, Kugel shows all readers “not only where to look, but how” (Samantha Brown), and promises that we too can rediscover the joy of discovery. “Travel is not about the destination but the experience. . . . That’s what makes [it] so appealing, so addictive, and that’s what makes Rediscovering Travel so necessary.” — Peter Greenberg

**Minding the Earth, Mending the World**-Susan Murphy 2014-04-21
Shunryu Suzuki Roshi founded the San Francisco Zen Center in 1962, and after fifty years we have seen a fine group of Zen masters trained in the west take up the mantle and extend the practice of Zen in ways that might have been hard to imagine in those first early years. Susan Murphy, one of Robert Aitken's students and dharma heirs, is one of the finest in this group of young Zen teachers. She is also a fine writer, and following on the teaching of her Roshi she has engaged her spiritual work in the ordinary world, dealing with the practice of daily life and with the struggles of all beings. We know that our earth is in crisis, but is the situation beyond repair? Are we on a path of planetary disaster where the only proper response is to prepare for our melancholic dystopian future? Is there a way out of our suspicious cynicism? In the tradition of Thomas Berry, using this spiritual opportunity to change the very nature of our crisis, Susan Murphy offers a profound message, subtly presented with clarity and assurance, showing that engaged Buddhism provides a possible path to the necessary repair and healing.

**The California Deserts**-Bruce M Pavlik 2008-07-02
This highly readable, spectacularly illustrated compendium is an ecological journey into a wondrous land of extremes. The California Deserts explores the remarkable diversity of life in this harsh yet fragile quarter of the Golden State. In a rich narrative, it illuminates how that diversity, created by drought and heat, has evolved with climate change since the Ice Ages. Along the way, we find there is much to learn from each desert species—whether it is a cactus, pupfish, tortoise, or bighorn sheep—about adaptation to a warming, arid world. The book tells of human adaptation as well, and is underscored by a deep appreciation for the intimate knowledge acquired by native people during their 12,000-year desert experience. In this sense, the book is a journey of rediscovery, as it reflects on the ways that knowledge has been reclaimed and amplified by new discoveries. The book also takes the measure of the ecological condition of these deserts today, presenting issues of conservation, management, and restoration. With its many sidebars, photographs, and featured topics, The California Deserts provides a unique introduction to places of remarkable and often unexpected beauty.

**Incarnation**-O’Murchu, Diarmuid 2017-05-18

**Topophobia**-Dylan Trigg 2016-12-15
Topophobia: A Phenomenology of Anxiety is a vivid second-person inquiry into how anxiety plays a formative part in the constitution of subjectivity. While anxiety has assumed a central role in the history of philosophy—and phenomenology in particular—until now there has been no sustained study of how it shapes our sense of self and being in the world. This book seeks to address that lacuna. Calling upon the author’s own experience of being agoraphobic, it asks a series of critical questions: How is our experience of the world affected by our bodily experience of others? What role do moods play in shaping our experience of the world? How can we understand the role of conditions such as agoraphobia in relation to our normative understanding of the body and the environment? What is the relation between anxiety and home? The reader will gain an insight into the strange experience of being unable to cross a bridge, get on a bus, and enter a supermarket without tremendous anxiety. At the same time, they will discover aspects of their own bodily experience that are common to both agoraphobes and non-agoraphobes alike. Integrating phenomenological inquiry with current issues in the philosophy of mind, Trigg arrives at a renewed understanding of identity, which arranges self, other and world as a unified whole. Written with a sense of vividness often lacking in academic discourse, this is living philosophy.
The Romantic Imperative - Frederick C. Beiser 2006-04-28 The Early Romantics met resistance from artists and academics alike in part because they defied the conventional wisdom that philosophy and the arts must be kept separate. Indeed, as the literary component of Romanticism has been studied and celebrated in recent years, its philosophical aspect has receded from view. This book, by one of the most respected scholars of the Romantic era, offers an explanation of Romanticism that not only restores but enhances understanding of the movement’s origins, development, aims, and accomplishments—and of its continuing relevance. Poetry is in fact the general ideal of the Romantics, Frederick Beiser tells us, but only if poetry is understood not just narrowly as poems but more broadly as things made by humans. Seen in this way, poetry becomes a revolutionary ideal that demanded—and still demands—that we transform not only literature and criticism but all the arts and sciences, that we break down the barriers between art and life, so that the world itself becomes "romanticized." Romanticism, in the view Beiser opens to us, does not conform to the contemporary division of labor in our universities and colleges; it requires a multifaceted approach of just the sort outlined in this book.

This is an excellent book. Its ten chapters are much more accessible and often clearer than the larger classic tomes on the subject. Each takes up a very significant topic and is sure to be read with profit by a wide range of readers - whether they are new to the field or already quite familiar with it. The book concerns an era, Early German Romanticism, that is properly becoming a major focus of new research. This volume could become one of the most helpful steps in making the area part of the canon for Anglophone scholars in all fields today. It is surely one of the best remedies for correcting out of date images of the work of the German romantics as regressive, obscurantist, or irrelevant. Early German Romanticism extends and modifies the project of the Enlightenment. The author shows that it deserves our attention not only because it is an era represented by some of the most interesting and creative personalities in our cultural history, but also because its main line of thought is responsible for a way of thinking central to our own time, namely a naturalism that might be expansive enough to do justice to traditional interests in the unique value of human freedom. --Karl Ameriks, Professor of Philosophy, University of Notre Dame

This book is a very fine and erudite study. It is impressively wide-ranging: literature, metaphysics, political philosophy, science, ethics, and religion all come seriously into play. It almost functions as an introduction to Early German Romanticism at a very high though not forbidding level. --Ian Balfour, Professor of English, York University

After millions of years of evolution, we’ve arrived at the point where we can settle other worlds and begin the process of becoming multi-planetary. How did we get here? What does the future hold for us? Divided into four accessible sections, Beyond the Known examines major periods of discovery and rediscovery, from Classical Times, when Phoenicians, Persians, and Greeks ventured forth; to The Age of European Exploration, which saw colonies sprout on nearly every continent; to The Era of Scientific Inquiry, when researchers developed new tools for mapping and traveling farther; to Our Spacefaring Future, which unveils plans currently underway for settling other planets and, eventually, traveling to the stars. A Mission Manager at SpaceX with a lively voice, Andrew Rader is at the forefront of space exploration. The Cost of Discipleship-Dietrich Bonhoeffer 2012-08-07 NEW FOREWORD BY ERIC METAXAS Dietrich Bonhoeffer, one of the most important theologians of the twentieth century, illuminates the relationship between ourselves and the teachings of Jesus in this classic book on living as a Christian. What can the call to discipleship, the adherence to the word of Jesus, mean today to the businessman, the soldier, the laborer, or the government worker? What did Jesus mean to say to us? What is his will for us today? Drawing on the Sermon on the Mount, Dietrich Bonhoeffer answers these timeless questions by providing a seminal reading of the dichotomy between "cheap grace" and "costly grace." "Cheap grace," Bonhoeffer wrote, "is the grace we bestow on ourselves...grace without discipleship....Costly grace is the gospel which must be sought again and again, the girl which must be asked for, the door at which a man must know....It is costly because it costs a man his life, and it is grace because it gives a man the only true life." The Cost of Discipleship is a compelling statement of the demands of sacrifice and ethical consistency from a man whose life and thought were exemplary articulations of a new type of leadership inspired by the Gospel, and imbued with the spirit of Christian humanism and a creative sense of civic duty.
