Archaeology or archeology is the study of human activity through the recovery and analysis of material culture. The archaeological record consists of artifacts, architecture, biofacts or ecofacts, sites, and cultural landscapes. Archaeology can be considered both a social science and a branch of the humanities. In Europe it is often viewed as either a discipline in its own right or a sub-field.

BA Archaeology - Reading
Exciting career opportunities. Archaeology is more than studying the past: it’s a discipline that actively prepares you for the job market. You’ll develop an impressive range of practical and academic skills, whether you want to move into the archaeology or heritage sectors or enter a wide range of other industries and careers.

Three-age system - Wikipedia
The three-age system is the periodization of human pre-history (with some overlap into the historical periods in a few regions) into three time-periods: [better source needed] the Stone Age, the Bronze Age, and the Iron Age; although the concept may also refer to other tripartite divisions of historic time-periods. In history, archaeology and physical anthropology, the three-age system is a

The History of Llamas and Alpacas in South America
Apr 03, 2018 · Domesticated from the guanaco in the Peruvian Andes some 6000–7000 years ago, the llama was moved into lower elevations by 3,800 years ago, and by 1,400 years ago, they were kept in herds on the northern coasts of Peru and Ecuador. In particular, the Inca used llamas to move their imperial pack trains into southern Colombia and central Chile.

ARCHAEOLOGY WORLD
Archaeologists in central England working on the HS2 project have uncovered a set of incredible rare Roman statues whilst excavating a Norman Church in Stoke Mandeville. In the final stages of the excavation at the site of the old St Mary’s Norman church in Buckinghamshire, archaeologists were excavating a circular ditch around what was

**Slavery in Antebellum Georgia - New Georgia Encyclopedia**

Oct 20, 2003 · The lower Piedmont, or Black Belt, counties—so named after the region’s distinctively dark and fertile soil —were the site of the largest, most productive cotton plantations. Over the antebellum era some two-thirds of the state’s total population lived in these counties, which encompassed roughly the middle third of the state.

**When Isis Was Queen - Archaeology Magazine**

When the Romans conquered Egypt in 30 B.C., the country’s system of temples, which had sustained religious traditions dating back more than 3,000 years, began to slowly wither away. Starved of

**The Origins of Rice Domestication in China - ThoughtCo**

Jul 03, 2019 · Earliest Evidence. The oldest evidence of rice consumption identified to date is four grains of rice recovered from the Yuchanyan Cave, a rock shelter in Dao County, Hunan Province in China. Some scholars associated with the site have argued that these grains seem to represent very early forms of domestication, having characteristics of both japonica and sativa.

**Creek Indians - New Georgia Encyclopedia**

Aug 08, 2002 · The history of early Georgia is largely the history of the Creek Indians. For most of Georgia’s colonial period, Creeks outnumbered both European colonists and enslaved Africans and occupied more land than these newcomers. Not until the 1760s did the Creeks become a minority population in Georgia. They ceded the balance of their lands to […]
