Complementary and Alternative Medicine Practices in Diabetes Management U2013 an Indian Scenario

The Impact of Un-proven Complementary and Alternative Medicine Practices in Diabetes Management U2013 an Indian Scenario

The book provides a step-by-step guide to diabetes care for doctors, nurses, and other healthcare professionals working in primary, community, and secondary care. The author draws on practical experience taking a common-sense approach to the assessment, education, and treatment of diabetes across all age groups and ethnic backgrounds. There are detailed sections on helping patients manage their diabetes in everyday life, extensive advice on the monitoring and adjustment of glucose levels, and discussion on preventing and coping with emergencies. Focus is primarily on the prevention, detection, and treatment of diabetes. This is the standard reference for the increasing number of people integrating alternative medicines into their lives and their mainstream health-care organizations.

The Journal of Alternative and Complementary Medicine- 2009

Natural, Alternative, and Complementary Health Care Practices - Roxana Huebscher 2003 Outlining natural, alternative and complementary therapies for common outpatient conditions, this manual includes Shuler's nurse practitioner practice model for problem-focused holistic assessment. It is organized by body system, focusing on interventions, followed by a reference section.

Clinical Decision Making in Complementary & Alternative Medicine - Matthew Leach 2010-11-03 An exceptional health resource addressing professional practice issues in complementary and alternative medicine Clinical Decision Making in Complementary & Alternative Medicine differs from other medical texts by introducing a systematic clinical framework for the practice of complementary and alternative medicine. While comparable titles may explore the use or efficacy of specific complementary and alternative medicine interventions, this indispensable textbook highlights evidence-based interventions, while helping practitioners apply them within a clinical decision making framework. Clinical Decision Making in Complementary & Alternative Medicine is a one-of-a-kind health reference for clinicians, students and educators alike. Divided into two parts - theoretical foundation and practical application - the book includes case studies on health conditions such as acne, irritable bowel syndrome and migraine. Clinical Decision Making in Complementary & Alternative Medicine is also unique in that it: • focuses on evidence-based practice while also paying attention to the underlying philosophy of complementary and alternative medicine • includes learning objectives and activities to consolidate reader knowledge and help lecturers teaching complementary and alternative medicine students • enables complementary and alternative medicine practitioners to systematically assess, diagnose, treat and evaluate client-centred health problems in accordance with the established art, science and philosophy of complementary and alternative medicine • guides practitioner thinking, assessment and care - all of which may help increase professional autonomy and accountability, improve client outcomes and quality of care, and reduce errors in decision making.
