Exercise and Sport Sciences Reviews made the transition from an annual hardcover series book to a quarterly journal in January 2000. The mission of this American College of Sports Medicine publication is to provide premier, peer-reviewed quarterly reviews of the most contemporary scientific, medical, and research-based topics emerging in the field of sports ...

**Protease inhibitor (pharmacology) - Wikipedia**
Protease inhibitors (PIs) are a class of antiviral drugs that are widely used to treat HIV/AIDS and hepatitis C. Protease inhibitors prevent viral replication by selectively binding to viral proteases (e.g. HIV-1 protease) and blocking proteolytic cleavage of protein precursors that are necessary for the production of infectious viral particles. Protease inhibitors that have been developed ...

**Fat burners: nutrition supplements that increase fat**
1 School of Sport and Exercise Sciences, University of Birmingham, Birmingham, UK. a.e.jeukendrup@bham.ac.uk; PMID: 21951331 DOI: 10.1111/j.1467-789X.2011.00908.x Abstract The term ‘fat burner’ is used to describe nutrition supplements that are claimed to acutely increase fat metabolism or energy expenditure, impair fat absorption, increase

Pharmacology MSc Postgraduate taught; Professional Course
Pharmacology (20 cp) In this module, you’ll see how genes can influence our physiology, and hence our pharmacological response to drugs used to treat pathological conditions. You’ll develop the concept of tailoring therapeutic drugs as the future of drug design, enabling physicians to prescribe personalised medical treatments based on an

IJERPH | Free Full-Text | Occlusal Splints and Exercise
The role of the dento-mandibular apparatus and, in particular, occlusion and jaw position, received increased attention during last years. In the present study, we aimed to systematically review, on the light of the new potential insights, the
published literature covering the occlusal splint (OS) applications, and its impact on exercise performance.

**Pharmacology and Drug Discovery MSc (2022/23) | Coventry**  
Research-inspired teaching with input from experts in our Sport, Exercise and Life Sciences research centre (CSELS), which focuses on the themes of cellular and molecular biosciences; biological systems, health and disease; pharmacology; and physical activity, exercise and ...  

**Post-Activation Potentiation - Science for Sport**  
Jan 29, 2016 - Whilst the conditioning exercise has been proven to improve performance, its effect can only be realised once the initial fatigue of the conditioning exercise has diminished (fitness-fatigue theory). There is still no agreement towards an optimal rest time, 3-12 minutes is the current best recommendation but this must be tailored to the athlete  

**Courses - University of Wolverhampton - University of**  
University of Wolverhampton is a large UK university based in the West Midlands, offering undergraduate degrees and postgraduate courses across 4 faculties.  

**Journal of Cardiac and Pulmonary Rehabilitation- Open**  
Exercise-based Cardiac Rehabilitation is also called as physical exercise-based therapy, is considered as central strategy for rehabilitation program. Studies revealed that Exercise-based Cardiac Rehabilitation program will reduce the cardiovascular mortality and morbidity in patients with cardiovascular complications.  

**IJERPH | Free Full-Text | Integrative Review of Exercise**  
Many competitive and elite athletes continue to train throughout their pregnancies and many visit or live at altitude. The purpose of this integrative review is to synthesize, analyze and critique published studies regarding the safety of serious recreational or elite athletes exercising at altitude while pregnant. Seven databases were searched, and 157 documents were located, which ...  

**Effect of Low-Intensity vs High-Intensity Walking Exercise**  
In this study, patients were randomized according to pain levels during exercise into a low-intensity or a high-intensity walking exercise group or a nonexercise control group. Although pain can indirectly represent stress levels during exercise, it is not a surrogate marker for well-established indicators of exercise intensity, such as heart  

**Pharmacology and Drug Discovery PhD/MRes 2022 - University**  
Pharmacology is concerned with the studying the effects of drugs on the body, as well as the effects of the body on the drugs. We hold significant grant funding in these strategic areas (Wellcome funding PhD programme in Drug Discovery and Team Science) and are about to launch new BSc degree in Pharmacology, supported by colleagues from across a wide range ...
