The Oldest Possible Memory-Sammlung Hauser und Wirth 2001 The Oldest Possible Memory was published to accompany an exhibition of one of the most remarkable private collections of twentieth-century art in the world, the Sammlung Hauser and Wirth Collection, and to serve as the first volume documenting it. From Louise Bourgeois to Sarah Lucas, Francis Picabia to Robert Gober, Alexander Calder to Raymond Pettibon and many others, the range and quality of works presented here is astonishing.

Du- 1997

World Development Report 1978- 1978 This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Reshaping the World - Ernesto Castañeda 2021-03-16 This volume provides information and analyses to better grasp the social implications of geographical borders as well as the individuals who travel between them and those who live in border regions. Sociologists, anthropologists, philosophers, linguists, and scholars of international relations and public health are just some of the authors contributing to Rethinking Borders. The diversity in the authors’ disciplines and the topics they focus on exemplify the intricacies of borders and their manifold effects. This openness to so many schools of thought stands in contrast to the solidification of stricter borders across the globe. The contributions range from case studies of migrants’ sense of belonging and safety to theoretical discussions about migration and globalization, from empirical studies about immigrant practices and exclusionary laws to ethical concerns about the benefits of inclusion. It is timely that this collective work is published in the middle of a pandemic that has affected every single part of the world. Unprecedented border closures and stringent travel restrictions have not been enough to contain the virus entirely. As COVID-19 shows, diseases, ideas, and xenophobic and racist discourses know no borders. Plans that transcend borders are vital when dealing with global threats, such as climate change and pandemics.

Guiding Principles for Stabilization and Reconstruction - United States Institute of Peace 2009 "Guiding principles for stabilization and reconstruction presents the first-ever, comprehensive set of shared principles for building sustainable peace in societies emerging from violent conflict ... A product of the collaboration between the United States Institute of Peace and the United States Army Peacekeeping and Stability Operations Institute, this manual reflects the input of dozens of institutions across the peacebuilding community. It is based on a comprehensive review of major strategic policy documents from state ministries of defense, foreign affairs and development, along with major intergovernmental and nongovernmental organizations that toil in war-shattered landscapes around the globe"--Page 4 of cover.

Punched-Card Systems and the Early Information Explosion, 1880-1945 - Lars Heide 2009-04-27 At a time when Internet use is closely tracked and social networking sites supply data for targeted advertising, Lars Heide presents the first academic study of the invention that fueled today’s information revolution: the punched card. Early punched cards helped to process the United States census in 1890. They soon proved useful in calculating invoices and issuing pay slips. As demand for more sophisticated systems and reading machines increased in both the United States and Europe, punched cards served ever-larger data-processing purposes. Insurance companies, public utilities, businesses, and governments all used them to keep detailed records of their customers, competitors, employees, citizens, and enemies. The United States used punched-card registers in the late 1930s to pay roughly 21 million Americans their Social Security pensions, Vichy France used similar technologies in an attempt to mobilize an army against the occupying German forces, and the Germans in 1941 developed several punched-card registers to make the war effort—and surveillance of minorities—more effective. Heide’s analysis of these three major punched-card systems, as well as the impact of the invention on Great Britain, illustrates how different cultures collected personal and financial data and how they adapted to new technologies. This comparative study will interest students and scholars from a wide range of disciplines, including the history of technology, computer science, business history, and management and organizational studies.

Foundations of the Nazi Police State - George C. Browder 2021-05-11 The abbreviation "Nazi," the acronym "Gestapo," and the initials "SS" have become resonant elements of our vocabulary. Less known is "SD," and
hardly anyone recognizes the combination "Sipo and SD." Although Sipo and SD formed the heart of the National Socialist police state, the phrase carries none of the ominous impact that it should. Although no single organization carries full responsibility for the evils of the Third Reich, the SS-police system was the executor of terrorism and "population policy" in the same way the military carried out the Reich's imperialistic aggression. Within the police state, even the concentration camps could not rival the impact of Sipo and SD. It was the source not only of the "desk murderers" who administered terror and genocide by assigning victims to the camps, but also of the police executives for identification and arrest, and of the command and staff for a major instrument of execution, the Einsatzgruppen. Foundations of the Nazi Police State offers the narrative and analysis of the external struggle that created Sipo and SD. This book is the author's preface to his discussion of the internal evolution of these organizations in Hitler's Enforcers: The Gestapo and the SS Security Service in the Nazi Revolution.

Unity of Mission-Melanne A Civic 2019-07-20 While much has been written about civilian-military teams in Vietnam and, most recently, in Iraq and Afghanistan, the subject has not been addressed in a single, comprehensive publication containing historical context and reflecting a broad diversity of views. It is the intention of the coeditors of Unity of Mission to fill this gap. The authors are convinced that without unity among military and civilian actors, long-term mission success is difficult at best. They believe the essays contained in this volume attest to this assertion. They are also fully aware that civilian-military teams are not a silver bullet. Rather, at best, such teams serve as a useful tool in a more comprehensive security framework. Nevertheless, in an age of budgetary constraints, the need to coordinate military and civilian resources-hard, kinetic, and soft power-is clear. It is the opinion of the coeditors that civilian-military teams are critical to achieving the goals of sustainable peace, stability, and security.

The German Chemical Industry in the Twentieth Century-John E. Lesch 2013-04-17 In the twentieth century, dyes, pharmaceuticals, photographic products, explosives, insecticides, fertilizers, synthetic rubber, fuels, and fibers, plastics, and other products have flowed out of the
chemical industry and into the consumer economies, war machines, farms, and medical practices of industrial societies. The German chemical industry has been a major site for the development and application of the science-based technologies that gave rise to these products, and has had an important role as exemplar, stimulus, and competitor in the international chemical industry. This volume explores the German chemical industry's scientific and technological dimension, its international connections, and its development after 1945. The authors relate scientific and technological change in the industry to evolving German political and economic circumstances, including two world wars, the rise and fall of National Socialism, the post-war division of Germany, and the emergence of a global economy. This book will be of interest to historians of modern Germany, to historians of science and technology, and to business and economic historians.

Conservative Parties and the Birth of Democracy-Daniel Ziblatt 2017-04-17 How do democracies form and what makes them die? Daniel Ziblatt revisits this timely and classic question in a wide-ranging historical narrative that traces the evolution of modern political democracy in Europe from its modest beginnings in 1830s Britain to Adolf Hitler's 1933 seizure of power in Weimar Germany. Based on rich historical and quantitative evidence, the book offers a major reinterpretation of European history and the question of how stable political democracy is achieved. The barriers to inclusive political rule, Ziblatt finds, were not inevitably overcome by unstoppable tides of socioeconomic change, a simple triumph of a growing middle class, or even by working class collective action. Instead, political democracy's fate surprisingly hinged on how conservative political parties – the historical defenders of power, wealth, and privilege – recast themselves and coped with the rise of their own radical right. With striking modern parallels, the book has vital implications for today's new and old democracies under siege.

German Industry and Global Enterprise-Werner Abelshauser 2003-11-10 The corporate history of BASF spans an era of German and international economic history that began with the rise of the ‘new industries’ as of the late nineteenth century and continues today in their confrontation with the new economy. This book examines BASF's corporate governance, financial system, industrial relations, system of qualification and relation to other companies. A corporate history of BASF promises more than an insight into the functioning of an industrial organisation. It also reveals the reasons for the extraordinary economic dynamics of the German empire and the enormous expansion of the world economy before World War I. BASF's history stands at the centre of Germany's wartime economy during two world wars and highlights both its strengths and weaknesses. Just as the IG Farben trust helped support Germany's course of politicoeconomic autarky after 1933, so it was that BASF helped facilitate West Germany's startlingly quick return to the world market. BASF has since been among the transnational companies whose efforts at the leading edge of economic and technological progress are paradigmatic for Germany's entry into the new economy of the twenty-first century.

PISA The PISA 2003 Assessment Framework Mathematics, Reading, Science and Problem Solving Knowledge and Skills-OECD 2004-03-02 The PISA 2003 Assessment Framework presents the conceptual underpinning of the PISA 2003 assessments. Within each assessment area, the volume defines the content that students need to acquire, the processes that need to be performed and the contexts in which knowledge and skills are applied.

Enciclopedia Internacional de Pseud·'nimos-Michael Peschke 2006 This Encyclopedia is the first to compile pseudonyms from all over the world, from all ages and occupations in a single work: some 500,000 pseudonyms of roughly 270,000 people are deciphered here. Besides pseudonyms in the narrower sense, initials, nick names, order names, birth and married names etc. are included. The volumes 1 to 9 list persons by their real names in alphabetical order. To make the unequivocal identification of a person easier, year and place of birth and death are provided where available, as are profession, nationality, the pseudonym under which the person was known, and finally, the sources used. The names of professions given in the source material have been translated into English especially for this encyclopaedia. In the second part, covering the volumes 10 to 16, the
Pseudonyms are listed alphabetically and the real names provided. Approx. 500,000 pseudonyms of about 270,000 persons. First encyclopedia including pseudonyms from all over the world, all times, and all occupations. Essential research tool for anyone wishing to identify persons and names for his research within one single work.

**A Reader in Themed and Immersive Spaces** - Scott A. Lukas

**The Letters of Mina Harker** - Dodie Bellamy 2021-10-19 Bellamy's debut novel revives the central female character from Bram Stoker's Dracula and imagines her as an independent woman living in San Francisco during the 1980s. Hypocrisy's not the problem, I think, it's allegory the breeding ground of paranoia. The act of reading into--how does one know when to stop? KK says that Dodie has the advantage because she's physical and I'm "only psychic." ... The truth is: everyone is adopted. My true mother wore a turtleneck and a long braid down her back, drove a Karmann Ghia, drank Chianti in dark corners, fucked Gregroy Corso ... --Dodie Bellamy, The Letters of Mina Harker. First published in 1998, Dodie Bellamy's debut novel The Letters of Mina Harker sought to resuscitate the central female character from Bram Stoker's Dracula and reimagine her as an independent woman living in San Francisco during the 1980s--a woman not unlike Dodie Bellamy. Harker confesses the most intimate details of her relationships with four different men in a series of letters. Vampirizing Mina Harker, Bellamy turns the novel into a laboratory: a series of attempted transmutations between the two women in which the real story occurs in the gaps and the slippages. Lampooning the intellectual theory-speak of that era, Bellamy's narrator fights to inhabit her own sexuality despite feelings of vulnerability and destruction. Stylish but ruthlessly unpretentious, The Letters of Mina Harker was Bellamy's first major claim to the literary space she would come to inhabit.

**Climate Change, Human Security and Violent Conflict** - Jürgen Scheffran 2012-05-26 Severe droughts, damaging floods and mass migration: Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures. But how severe are the security risks and conflict potentials of climate change? Could global warming trigger a sequence of events leading to economic decline, social unrest and political instability? What are the causal relationships between resource scarcity and violent conflict? This book brings together international experts to explore these questions using in-depth case studies from around the world. Furthermore, the authors discuss strategies, institutions and cooperative approaches to stabilize the climate-society interaction.

**New Glass** - Corning Museum of Glass 1979 A sampling of glass work by 196 artists from 28 countries.

**Books in Print** - R R Bowker Publishing 1989

**Aging between Participation and Simulation** - Joschka Haltaufderheide 2020-04-06 With increasing urgency, decisions about the digitized future of healthcare and implementations of new assistive technologies are becoming focal points of societal and scientific debates and addresses large audiences. Decisions require a careful weighing of risks and benefits and contextualizing in-depth ethical analysis with robust empirical data. However, up to now, research on social assistive technologies is mostly dispersed over different academic fields and disciplines. A comprehensive overview on discussions regarding values at stake and ethical assessment of recent developments especially in healthcare is largely missing. This publication initiates an interdisciplinary discourse on ethical, legal and social implications of socially assistive technologies in healthcare. Contributions include perspectives from nursing science, social sciences, philosophy, medical ethics, economics and law to present an - to our knowledge - first and comprehensive overview on different aspects of the use and implementation of socially assistive technologies from an ethical perspective. It combines practically relevant insights and examples from current research and development with ethical analysis to uncover exemplary moral tipping points between promotion of participation or well-
The Social Question in the Twenty-First Century - 2019-06-25 At publication date, a free ebook version of this title will be available through Luminos, University of California Press’s Open Access publishing program. Visit www.luminosoa.org to learn more. Want. Disease. Ignorance. Squalor. Idleness. Taken together, these comprise the “giant evils” expressed in the Social Question—first raised in mid-nineteenth-century Europe to diagnose the crises produced by the emergence of the industrial society. Due to a globalized switch to neoliberalism in the final quarter of the twentieth century, the Social Question has made a worldwide comeback. The Social Question in the Twenty-First Century maps out the linked crises across regions and countries and identifies the renewed and intensified social question as a labor issue above all. The volume includes discussions from every corner of the globe, focusing on American exceptionalism, Chinese repression, Indian exclusion, South African colonialism, democratic transitions in Eastern Europe, and other phenomena. The effects of capitalism dominating the world, the impact of the scarcity of waged work, and the acknowledgment of how the dispossessed poor bear the brunt of the crisis are all evaluated in this carefully curated volume. Both thorough and thoughtful, the book serves as collective effort to revive and reposition the Social Question, reconstructing its meaning and its politics in the world today.

Voices in Ruins - A. Badenoch 2008-07-24 Immediately after the Second World War, the radio was the best-preserved medium of mass communication in Germany. This book explores the implications of this dominance by asking how everyday broadcasting constructed ideas of 'normal' times, people and places in the destroyed, divided and occupied zones of what would become the Federal Republic.

Digital Economies at Global Margins - Mark Graham 2019-02-12 Investigations of what increasing digital connectivity and the digitalization of the economy mean for people and places at the world's economic margins. Within the last decade, more than one billion people became new Internet users. Once, digital connectivity was confined to economically prosperous parts of the world; now Internet users make up a majority of the world's population. In this book, contributors from a range of disciplines and locations investigate the impact of increased digital connectivity on people and places at the world's economic margins. Does the advent of a digitalized economy mean that those in economic peripheries can transcend spatial, organizational, social, and political constraints—or do digital tools and techniques tend to reinforce existing inequalities? The contributors present a diverse set of case studies, reporting on digitalization in countries ranging from Chile to Kenya to the Philippines, and develop a broad range of theoretical positions. They consider, among other things, data-driven disintermediation, women's economic empowerment and gendered power relations, digital humanitarianism and philanthropic capitalism, the spread of innovation hubs, and two cases of the reversal of core and periphery in digital innovation. Contributors Niels Beerepoot, Ryan Burns, Jenna Burrell, Julie Yujie Chen, Peter Dannenberg, Uwe Deichmann, Jonathan Donner, Christopher Foster, Mark Graham, Nicolas Friederici, Hernan Galperin, Catrihel Greppi, Anita Gurumurthy, Isis Hjorth, Lilly Irani, Molly Jackman, Calestous Juma, Dorothea Kleine, Madlen Krone, Vili Lehdonvirta, Chris Locke, Silvia Masiero, Hannah McCarrick, Bitange Ndemo, Jorien Oprins, Elisa Oreglia, Stefan Ouma, Robert Pepper, Jack Linchuan Qiu, Julian Stenmanns, Tim Unwin, Julia Verne, Timothy Waema
Decades before the terms “eco-friendly” and “sustainable growing” entered the vernacular, How to Grow More Vegetables demonstrated that small-scale, high-yield, all-organic gardening methods could yield bountiful crops over multiple growing cycles using minimal resources in a suburban environment. The concept that John Jeavons and the team at Ecology Action launched more than 40 years ago has been embraced by the mainstream and continues to gather momentum. Today, How to Grow More Vegetables, now in its fully revised and updated 8th edition, is the go-to reference for food growers at every level: from home gardeners dedicated to nurturing their backyard edibles in maximum harmony with nature’s cycles, to small-scale commercial producers interested in optimizing soil fertility and increasing plant productivity. Whether you hope to harvest your first tomatoes next summer or are planning to grow enough to feed your whole family in years to come, How to Grow More Vegetables is your indispensable sustainable garden guide.

Sheela-na-gigs-Barbara Freitag 2005-08-15 Here Barbara Freitag examines all the literature on the subject since their discovery 160 years ago, highlighting the inconsistencies of the various interpretations in regard to origin, function and name. By considering the Sheela-na-gigs in their medieval social context, she suggests that they were folk deities with particular responsibility for assistance in childbirth. This fascinating survey sheds new light on a controversial phenomenon, and also contains a complete catalogue of all known Sheela-na-gigs, including hitherto unrecorded or unpublished figures.
