The City Beyond Architecture

Felipe Correa 2016-06-07 During the last decade, the South American continent has seen a strong push for transnational integration, initiated by the former Brazilian president Lula da Silva, whose vision of a Mercado Común Latinoamericano (MERCOSUR) is an ideological expression of the multilateral integration of South America. It aims at providing social and cultural connections which linked colonial Lahore with North India and beyond. In contrast to portrayals of Lahore as inward looking and a world unto itself, the authors argue that internationalization and social space are imagined and represented. In doing so, this volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries.

Colonial Lahore-Ian Talbot 2018 A number of studies of colonial Lahore in recent years have explored such themes as the city’s cosmopolitanism and the rise of mass culture. This volume’s survey of the city in the late eighteenth and early nineteenth centuries shows how the city’s social landscape, with its multicultural and multilingual population, has been shaped by a complex interplay of local and global forces. In this broad view in assessing not just the fundamentals of urban life, the way cities are occupied and organised on a daily basis, but also the urban midway, the way cities are imagined and represented. In doing so, this volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries.

Metachronopolis: The City Beyond Time

John C. Wright 2017-04-04 Metachronopolis is the golden city beyond time. Ruled by the Masters of Time, who can travel freely throughout the multitudinous time lines of Man’s history, the city is a shining society of heroes and horrors. For the arrogant Masters, who steal famous men and women out of the past, it offers an endless feast of power and glory. But for the people of the city, the Masters’ power is a curse.

Stefan Szymanski 2020-10-13 The changing fortunes of Detroit, told through the lens of the city’s major sporting events, by the bestselling author of Stadiums and Stadia. The rise and fall of the Motown sports to the city’s shifting fortunes. In an era where many teams have left rustbelt cities to relocate elsewhere, Detroit has held on to its franchises, and there is current great hope in the revival of the city focused on its downtown sports complexes—but to whose benefit? Szymanski and Weineck show how the fate of the teams in Detroit’s stadiums, gym, and fields is echoed in the rise and fall of the car industry, political upheaval ushered in by the depression, World War II, 1967 uprising, and its recent bankruptcy and renewal. Driven by the connection that sports not only mirror society but also have a special power to create both community and enduring narratives that help define a city’s sense of self. City of Champions is a unique history of the most American of cities.

this book identifies dynamics through which a ‘break’ with previous configurations has been operated, and new brittle zones of socio-technical controversy through which urban infrastructure (and its wider meaning) are being negotiated and fought over. In so doing, across a diverse set of urban contexts, new ways in which processes of urbanization and infrastructure production are being combined with crucial sociopolitical implications: through shifting political economies of infrastructure which rework resource distribution and value creation; through new infrastructural spaces and territorialities which redefine socio-technical systems for particular interests and claims; and through changing offsets between individual and collective appropriation, experience and mobilization of infrastructure. With contributions from leading authorities in the field and drawing on theoretical advances and original empirical material, this book is a major contribution to an ongoing infrastructural turn in urban studies, and will be of interest to all those concerned by the diverse forms and contested outcomes of contemporary urban change across North and South.

The Death and Life of Great American Cities-Jane Jacobs 2016-07-30 Thirty years after its publication, The Death and Life of Great American Cities was described by The New York Times as "perhaps the most influential single work in the history of town planning...[I]t can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satirical account of traditional planning theory can still be read for pleasure even by those who loath abstract and intellectualized the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

Beyond the Walled City-Guadalupe Garcia 2015-12-22 "Once one of the most important port cities in the New World, Havana was a model for the planning and construction of other colonial cities. This book tells the story of how Havana was conceived, built, and managed and explores the relationship between colonial empire and urbanization in the Americas. Guadalupe Garcia shows how the policing of urban life and public space by imperial authorities from the sixteenth century onward was explicitly centered on politics of racial exclusion and social control. She illustrates the importance of colonial ideologies in the production of urban spaces and the centrality of race and racial exclusion as an organizing ideology of urban life in Havana. Beyond the Walled City connects colonial urban practices to contemporary debates on urbanization, the policing of public spaces, and the urban dislocation of black and ethnic populations across the region."--Provided by publisher.

Decline, Renewal and the City in Popular Music Culture: Beyond the Beatles-Sara Cohen 2017-09-29 How is popular music culture connected with the life, image, and identity of a city? How, for example, did the Beatles emerge in Liverpool, how did they come to be categorized as part of Liverpool culture and identity and used to develop and promote the city, and how have connections between the Beatles and Liverpool been forged and contested? This book explores the relationship between popular music and the city using Liverpool as a case study. Firstly, it examines the impact of social and economic change within that city on its popular music culture and the many diverse ways in which it influences city life and informs the way that the city is thought about, valued and experienced. Cohen highlights popular music’s unique role and significance in the making of cities, and illustrates how de-industrialization and economic restructuring during the 1980s and 1990s. Cities Beyond Borders-Nicolas Kenny 2016-05-25 Drawing on a body of research covering primarily Europe and the Americas, but stretching also to Asia and Africa, from the mid-eighteenth century to the present, this book explores the methodological and heuristic implications of studying cities in relation to one another. Moving fluidly between comparative and transactional methods, as well as across regional and national lines, the contributors to this volume demonstrate the necessity of this broader view in assessing not just the fundamentals of urban life, the way cities are occupied and organized on a daily basis, but also the urban mimicks, the way cities are imagined and represented. In doing so the volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries.
