**Beyond Oneness and Difference**
Brook Ziporyn 2013-11-01
Continues the author’s inquiry into the development of the Chinese philosophical concept Li, concluding in Song and Ming dynasty Neo-Confucianism. Beyond Oneness and

Xiang, a Neo-Taoist thinker who developed a radical philosophy of freedom and spontaneity.
Difference considers the development of one of the key concepts of Chinese intellectual history, Li. A grasp of the strange history of this term and its seemingly conflicting implications—as oneness and differentiation, as the knowable and as what transcends knowledge, as the good and as the transcendence of good and bad, as order and as omnipresence—raises questions about the most basic building blocks of our thinking. This exploration began in the book’s companion volume, Ironies of Oneness and Difference, which detailed how formative Confucian and Daoist thinkers approached and demarcated concepts of coherence, order, and value, identifying both ironic and non-ironic trends in the elaboration of these core ideas. In the present volume, Brook Ziporyn goes on to examine the implications of Li as they develop in Neo-Daoist metaphysics and in Chinese Buddhism, ultimately becoming foundational to Song and Ming dynasty Neo-Confucianism, the orthodox ideology of late imperial China. Ziporyn’s interrogation goes beyond analysis to reveal the unsuspected range of human thinking on these most fundamental categories of ontology, metaphysics, epistemology, and ethics.

Ironies of Oneness and Difference - Brook Ziporyn
2012-09-20 Explores the development of Chinese thought, highlighting its concern with questions of coherence. Providing a bracing expansion of horizons, this book displays the unsuspected range of human thinking on the most basic categories of experience. The way in which early Chinese thinkers approached concepts such as one and many, sameness and difference, self and other, and internal and external stand in stark contrast to the way parallel concepts entrenched in much of modern thinking developed in Greek and European thought. Brook Ziporyn traces the distinctive and surprising philosophical journeys found in the works of the formative Confucian and Daoist thinkers back to a prevailing set of assumptions that tends to see questions of identity, value,
and knowledge—the subject matter of ontology, ethics, and epistemology in other traditions—as all ultimately relating to questions about coherence in one form or another. Mere awareness of how many different ways human beings can think and have thought about these categories is itself a game changer for our own attitudes toward what is thinkable for us. The actual inhabitation and mastery of these alternative modes of thinking is an even greater adventure in intellectual and experiential expansion.

Neo-Confucian Ecological Humanism
Nicholas S. Brasovan 2017-03-27
Addresses Ming Dynasty philosopher Wang Fuzhi’s neo-Confucianism from the perspective of contemporary ecological humanism. In this novel engagement with Ming Dynasty philosopher Wang Fuzhi (1619–1692), Nicholas S. Brasovan presents Wang’s neo-Confucianism as an important theoretical resource for engaging with contemporary ecological humanism. Brasovan coins the term “person-in-the-world” to capture ecological humanism’s fundamental premise that humans and nature are inextricably bound together, and argues that Wang’s cosmology of energy (qi) gives us a rich conceptual vocabulary for understanding the continuity that exists between persons and the natural world. The book makes a significant contribution to English-language scholarship on Wang Fuzhi and to Chinese intellectual history, with new English translations of classical Chinese, Mandarin, and French texts in Chinese philosophy and culture. This innovative work of comparative philosophy not only presents a systematic and comprehensive interpretation of Wang’s thought but also shows its relevance to contemporary discussions in the philosophy.
of ecology. This is a fine study of Wang Fuzhi’s complex and fascinating neo-Confucian cosmology. I learned an immense amount about one of China’s last great Confucian intellectuals. — John Berthrong, author of Expanding Process: Exploring Philosophical and Theological Transformations in China and the West

**Plantingian Religious Epistemology and World Religions**-Erik Baldwin
2018-11-29 Baldwin and McNabb explore how non-Christian religious traditions can utilize Plantinga’s epistemology. This book pays particular attention to the question, if there are believers from differing religious traditions that can rightfully utilize his epistemology, does this somehow prevent a Plantingian’s creedal-specific belief from being warranted?

**Returning to Zhu Xi**-David Jones 2015-11-20 A reconsideration of Zhu Xi, known as the “great synthesizer” of Confucianism, which establishes him as an important thinker in his own right. Zhu Xi (1130-1200), the chief architect of neo-Confucian thought, affected a momentous transformation in Chinese philosophy. His ideas came to dominate Chinese intellectual life, including the educational and civil service systems, for centuries. Despite his influence, Zhu Xi is known as the “great synthesizer” and rarely appreciated as a thinker in his own right. This volume presents Zhu Xi as a major world philosopher, one who brings metaphysics and cosmology into attunement with ethical and social practice. Contributors from the English- and Chinese-speaking worlds explore Zhu Xi’s unique thought and offer it to the Western philosophical imagination. Zhu Xi’s vision is critical, intellectually rigorous, and religious, telling us how to live in the transforming world of li—the emergent, immanent, and coherent patternings of natural and human milieu.

Vital Post-Secular Perspectives on Chinese Philosophical Issues - Lauren F. Pfister 2020-10-27 Vital Post-Secular Perspectives on Chinese Philosophical Issues presents a number of contemporary philosophical issues from a wide range of Chinese philosophical texts, figures, and sub-traditions that are usually not addressed in English studies of Chinese philosophical traditions. Lauren F. Pfister presents new perspectives in three parts: the first part offers critical perspectives on the life and works of one of the most significant 20th century Chinese philosophers and historian of Chinese philosophical traditions, Feng Youlan (1895-1990); the second part explores questions related to Ruist (“Confucian”) theism and the complicated textual developments within two canonical Ruist texts, ending with a critique of a 21st century translation and interpretation of one of those two classical texts; the third part presents philosophical assessments of 20th and 21st century cultural issues that have had immense social and interpretive impacts in contemporary Chinese contexts – Chinese utopian projects, Chinese netizens in “Human Flesh Searches,” and questions about the links between sageliness and saintliness in Ruist and Christian communities.

Natural Theology Reconfigured-Zhiqiu Xu 2016-03-22 Classic natural theology in its logical, rational, Aristotelian presentation has encountered an impasse. Since the Enlightenment, nature has ceased to be a vital topic in theological discussions until a recent revival of interest stemming from ecological and feminist concerns. Provocatively transcending boundaries between Philosophy and Theology, ancient and contemporary, East and West, Natural Theology Reconfigured revitalises the validity and relevancy of Natural Theology, a shipwrecked concept in the West, with the aid of Eastern Confucian Axiology and American Pragmatism.

Daoism-Livia Kohn 2019-10-04 Daoism: A Contemporary Philosophical Investigation explores philosophy of religion from a Daoist perspective. Philosophy of religion is a thriving field today, increasingly expanding from its traditional theistic, Christian roots into more cosmologically oriented Asian religions. This book raises a number of different issues on the three levels of cosmos, individual, and society, and addresses key questions like: What are the distinctive
characteristics of Daoist thought and cosmology? How does it approach problems of creation, body, mind, and society? What, ultimately, is Dao? How does it manifest and play a role in the world? What are the key features of Daoist communities and ethics? What role does the body play in Daoism? What do Daoists think is the relationship between language and reality? What is Daoist immortality? How do Daoists envision the perfect life on earth? The volume delves into philosophical subject matter in a way that is accessible to those approaching the topic for the first time, while also making an original contribution to Daoist philosophy of religion. This volume is suitable for use by undergraduate and graduate students studying Chinese religion and philosophy, as well as more general introductory courses on Daoism.

The Oxford Handbook of Japanese Philosophy-Bret W. Davis 2019-08-19 Japanese philosophy is now a flourishing field with thriving societies, journals, and conferences dedicated to it around the world, made possible by an ever-increasing library of translations, books, and articles. The Oxford Handbook of Japanese Philosophy is a foundation-laying reference work that covers, in detail and depth, the entire span of this philosophical tradition, from ancient times to the present. It introduces and examines the most important topics, figures, schools, and texts from the history of philosophical thinking in premodern and modern Japan. Each chapter, written by a leading scholar in the field, clearly elucidates and critically engages with its topic in a manner that demonstrates its contemporary philosophical relevance. The Handbook opens with an extensive introductory chapter that addresses the multifaceted question, "What is Japanese Philosophy?" The first fourteen chapters cover the premodern history of Japanese philosophy, with sections dedicated to Shinto and the Synthetic Nature of Japanese Philosophical
Thought, Philosophies of Japanese Buddhism, and Philosophies of Japanese Confucianism and Bushido. Next, seventeen chapters are devoted to Modern Japanese Philosophies. After a chapter on the initial encounter with and appropriation of Western philosophy in the late nineteenth-century, this large section is divided into one subsection on the most well-known group of twentieth-century Japanese philosophers, The Kyoto School, and a second subsection on the no less significant array of Other Modern Japanese Philosophies. Rounding out the volume is a section on Pervasive Topics in Japanese Philosophical Thought, which covers areas such as philosophy of language, philosophy of nature, ethics, and aesthetics, spanning a range of schools and time periods. This volume will be an invaluable resource specifically to students and scholars of Japanese philosophy, as well as more generally to those interested in Asian and comparative philosophy and East Asian studies.

Appreciating the Chinese Difference: Jim Behuniak Jr
2018-09-01 A wide-ranging exploration and critical assessment of the work of a major figure in Chinese and comparative philosophy. In this volume, prominent philosophers working in Chinese thought and related areas critically reflect upon the work of Roger T. Ames, one of the most significant contemporary figures working in the field of Chinese philosophy. Through his decades of collaborative work in comparative methodology and cross-cultural interpretation, along with a number of pathbreaking translations of Chinese philosophical texts, Ames has managed to challenge standing paradigms and open fresh avenues of research into the Chinese tradition. His work will be read and studied for years to come. The original essays presented here, which are substantive philosophical contributions in their own right, cover the full range of Ames’s scholarly output. They address methodological questions as
well as specific issues in textual interpretation, including ample discussion of Ames’ most recent and provocative contribution: Confucian role ethics. In the final section of the book, Ames responds to each essay. The result is a conversation and engagement that both underscores the vitality of his thinking and indicates the directions it may take in the future. Altogether, this work provides a snapshot of a remarkable career and an invitation to continue reflecting upon its meaning and importance. This is an outstanding collection, critically and constructively engaging a scholar whose work has shaped the entire field of Chinese philosophy. **The Roar of Awakening**
George Derfer 2013-05-02
The primary goal of this volume is to describe the contemporary state of affairs in Western psychotherapy, and to do so in a

Whiteheadian spirit: with genuine openness to the relative ways in which creativity, beauty, truth, and peace manifest themselves in various cultural traditions. This Whiteheadian Dialogue explores afresh an important cross-elucidatory path: what have we, and what can be learned from a dialogue with Eastern worldviews? In order to generate meaningful contrasts between these different systems of thought, all the papers address common core issues. On one hand, how does the given system understand the interaction of the individual, society, and nature (or cosmos)? On the other hand, what is the paradigm of all pathology and what is its typical or curative pattern?

**An Introduction to Chinese Philosophy**-Karyn Lai 2017-03-31 This book explores traditions including Confucianism, Daoism, Mohism, Legalism and Chinese Buddhism, and how they shape Chinese thought.
Merleau-Ponty and Buddhism-Jin Y. Park  
2009-08-13 Merleau-Ponty and Buddhism explores a new mode of philosophizing through a comparative study of Maurice Merleau-Ponty's phenomenology and philosophies of major Buddhist thinkers such as Nagarjuna, Chinul, Dogen, Shinran, and Nishida Kitaro. Challenging the dualistic paradigm of existing philosophical traditions, Merleau-Ponty proposes a philosophy in which the traditional opposites are encountered through mutual penetration. Likewise, a Buddhist worldview is articulated in the theory of dependent co-arising, or the middle path, which comprehends the world and beings in the third space, where the subject and the object, or eternalism and annihilation, exist independent of one another. The thirteen essays in this volume explore this third space in their discussions of Merleau-Ponty's concepts of the intentional arc, the flesh of the world, and the chiasm of visibility in connection with the Buddhist doctrine of no-self and the five aggregates, the Tiantai Buddhist concept of threefold truth, Zen Buddhist huatou meditation, the invocation of the Amida Buddha in True Pure Land Buddhism, and Nishida's concept of basho.

Having a Word with Angus Graham—Carine Defoort
2018-02-08 Critical reflections on the work of Angus Charles Graham, renowned Western scholar of Chinese philosophy and sinology. This volume engages with the works and ideas of Angus Charles
Graham (1919–1991), one of the most prominent Western scholars of Chinese philosophy, at the twenty-fifth anniversary of his passing. Over a professional career of more than thirty years, Angus Graham produced an impressive amount of scholarship on a wide array of topics, ranging from Chinese grammar and philology to poetry and philosophy. His combination of rigorous scholarship and philosophical originality has continued to inspire scholars to tackle related research topics, and in so doing, has required of them a response to his views. This book illustrates the range of scholarship still elaborating upon, disagreeing with, and reacting to Graham’s work on Chinese thought, philosophy, philology, and translation. Graham’s prolific writings have shaped the field of Chinese philosophy for the last four decades. Taking stock of how much contemporary discourse on Chinese philosophy has been influenced by Graham’s works and how far it has come from Graham’s days, while suggesting possible future trajectories, is timely. In addition, some of the contributors’ accounts of their personal encounters with Graham give readers a rather intimate and fascinating portrayal of the man behind the ideas.

New Life for Old Ideas-Yanming An 2019-05-15

Munro was more than an intellectual mentor. He has been an unfailing source of wisdom, inspiration, and support. Over five decades, Donald J. Munro has been one of the most important voices in sinological philosophy. His rapprochement with contemporary cognitive and evolutionary science helped bolster the insights of Chinese philosophers, and set the standard for similar explorations today. In this festschrift volume, students of Munro and scholars influenced by him celebrate Munro's body of work in essays that extend his legacy, exploring their topics as varied as the ethics of Zhuangzi’s autotelicity, the
teleology of nature in Zhu Xi, and family love in Confucianism and Christianity.

**Daoist Philosophy and Literati Writings in Late Imperial China** - Zuyan Zhou 2013-05-30 This volume first explores the transformation of Chinese Daoism in late imperial period through the writings of prominent intellectuals of the times. In
such a cultural context, it then launches an indepth investigation into the Daoist dimensions of the Chinese narrative masterpiece, The Story of the Stone—the inscriptions of Quanzhen Daoism in the infrastructure of its religious framework, the ideological ramifications of the Daoist concepts of chaos, purity, and the natural, as well as the Daoist images of the gourd, fish, and bird. Zhou presents the central position of Daoist philosophy both in the ideological structure of the Stone, and the literati culture that engenders it.

**Tao Yuanming and Manuscript Culture**-Xiaofei Tian 2011-07-01 Winner of a 2006 Choice Magazine Outstanding Academic Title Award As medieval Chinese manuscripts were copied and recopied through the centuries, both mistakes and deliberate editorial changes were introduced, thereby affecting readers' impressions of the author's intent. In Tao Yuanming and Manuscript Culture, Xiaofei Tian shows how readers not only experience authors but produce them by shaping texts to their interpretation. Tian examines the mechanics and history of textual transmission in China by focusing on the evolution over the centuries of the reclusive poet Tao Yuanming into a figure of epic stature. Considered emblematic of the national character, Tao Yuanming (also known as Tao Qian, 365?-427 c.e.) is admired for having turned his back on active government service and city life to live a simple rural life of voluntary poverty. The artlessness of his poetic style is held as the highest literary and moral ideal, and literary critics have taken great pains to demonstrate perfect consistency between Tao Yuanming's life and poetry. Earlier work on Tao Yuanming has tended to accept this image, interpreting the poems to confirm the image. Tao Yuanming and Manuscript Culture is a study of how this cultural icon was produced and of the elusive traces of another, historical Tao Yuanming behind the icon. By comparing four early biographies of the poet, Tian
shows how these are in large measure constructed out of Tao Yuanming's self-image as projected in his poetry and prose. Drawing on work in European medieval literature, she demonstrates the fluidity of the Chinese medieval textual world and how its materials were historically reconfigured for later purposes. Tian finds in Tao's poetic corpus not one essentialized Tao Yuanming, but multiple texts continuously produced long after the author's physical demise. Her provocative look at the influence of manuscript culture on literary perceptions transcends its immediate subject and has special resonance today, when the transition from print to electronic media is shaking the literary world in a way not unlike the transition from handwritten to print media in medieval China.

The Art of Chinese Philosophy - Paul Goldin
2020-04-07 A smart and accessible introduction to the most important works of ancient Chinese philosophy—the Analects of Confucius, Mozi, Mencius, Laozi, Zhuangzi, Sunzi, Xunzi, and Han Feizi This book provides an unmatched introduction to eight of the most important works of classical Chinese philosophy—the Analects of Confucius, Mozi, Mencius, Laozi, Zhuangzi, Sunzi, Xunzi, and Han Feizi. Combining accessibility with the latest scholarship, Paul Goldin, one of the world's leading authorities on the history of Chinese philosophy, places these works in rich context as he explains the origin and meaning of their compelling ideas. Because none of these classics was written in its current form by the author to whom it is attributed, the book begins by asking, "What are we reading?" and showing that understanding the textual history of the works enriches our appreciation of them. A chapter is devoted to each of the eight works, and the chapters are organized into three sections: "Philosophy of Heaven," which looks at how the Analects, Mozi, and Mencius discuss, often skeptically, Heaven (tian) as a source of philosophical values; "Philosophy of the
Way," which addresses how Laozi, Zhuangzi, and Sunzi introduce the new concept of the Way (dao) to transcend the older paradigms; and "Two Titans at the End of an Age," which examines how Xunzi and Han Feizi adapt the best ideas of the earlier thinkers for a coming imperial age. In addition, the book presents clear and insightful explanations of the protean and frequently misunderstood concept of qi—and of a crucial characteristic of Chinese philosophy, nondeductive reasoning. The result is an invaluable account of an endlessly fascinating and influential philosophical tradition.

Spiritual Exercises for the Postmodern Christian-
Matthew C. Kruger
2018-04-30 This book offers a challenging spirituality for a world filled with uncertainty and emotional struggle. Drawing from the work of ancient and contemporary thinkers, the author constructs a path to understanding oneself and understanding God in new and profound ways. This end is pursued by the use of spiritual exercises, mental practices which make changing one's way of life a real possibility. Further, by engaging directly with nothingness, meaninglessness, and the sheer lack of certain knowledge possessed by humans, an alternative form of spirituality is offered, one that prepares the contemporary Christian for all that life will bring.

**Daoism and Environmental Philosophy**-Eric S. Nelson  
2020-10-02 Daoism and Environmental Philosophy explores ethics and the philosophy of nature in the Daodejing, the Zhuangzi, and related texts to elucidate their potential significance in our contemporary environmental crisis. This book traces early Daoist depictions of practices of embodied emptying and forgetting and communicative strategies of undoing the fixations of words, things, and the bodily self. These are aspects of an ethics of embracing plainness and simplicity, nourishing the asymmetrically differentiated yet shared elemental body of life of the myriad things, and being responsively attuned in encountering and responding to things. These critical and transformative dimensions of early Daoism provide exemplary models and insights for cultivating a more expansive ecological ethos, environmental culture of nature, and political ecology. This work will be of interest to students and scholars interested in philosophy, environmental ethics and philosophy, and religious studies, and intellectual history.
