Climate Change Vulnerability in Western African Cities \[\text{Shillington, L. 2014-04-15} \]
In recent decades, urban crises and drought have struck urban regions in Africa like never before. Nevertheless, limited information is available on which to base development of early warning systems, identification of high-risk zones and formulation of local action plans. This book is about how to build the knowledge necessary for planning and strategies to combat climate change in their historic cities. It brings together lessons learned from a variety of development actions conducted by a number of scholars in disciplines ranging from meteorology and hydrogeology to urban planning and environmental management. Methodological tools to measure the impacts of extreme weather and natural disasters are presented along with possible approaches to improve the adaptive capacity of risk-bearing cities through planned actions at the local government level. The book is addressed to graduate students, researchers and practitioners interested in enhancing their knowledge and skills in order to mitigate climate change risks into their research and development projects in urban Africa.

Climate Change in Practice: Sahel-1, \[\text{Ndlie, 2017-07-31} \]
Documents an undergraduate course taught by the author. This course looks at the challenge and provides readers by using a series of topical questions concerning climate change and society. Topics covered provide answers to technical, socio-economic and moral questions surrounding the deployment of climate science: where to look and how to study a climate model, what is and what is not at risk from climate change, and how it will all go wrong. The book includes a section on climate science in practice. The book is addressed to graduate students, researchers and practitioners interested in enhancing their knowledge and skills in order to mitigate climate change risks into their research and development projects in urban Africa.

European Climate Vulnerabilities and Adaptation: \[\text{Schmidt-Thome, K. 2015-06-10} \]
This volume offers a conceptual and empirical framework for understanding the vulnerability of regions and their local communities to climate change and its impacts. The book includes a section on climate science in practice. The book is addressed to graduate students, researchers and practitioners interested in enhancing their knowledge and skills in order to mitigate climate change risks into their research and development projects in urban Africa.

Experiencing Climate Change in Bangladesh: \[\text{Mamun, S. 2014-03-03} \]
Experiencing Climate Change in Bangladesh: Vulnerability and Adaptation to Climate Change is a conceptual and empirical framework for understanding the vulnerability of coastal communities in Bangladesh to climate change and its impacts. The book includes a section on climate science in practice. The book is addressed to graduate students, researchers and practitioners interested in enhancing their knowledge and skills in order to mitigate climate change risks into their research and development projects in urban Africa.

Dealing with a Different Desert: \[\text{Salim Momtaz. 2015-09-10} \]
Dealing with a Different Desert: Climate Vulnerability and Adaptation Study for California: A Spatial Planning Perspective focuses on the impacts of climate change on regions and their local communities. The book includes a section on climate science in practice. The book is addressed to graduate students, researchers and practitioners interested in enhancing their knowledge and skills in order to mitigate climate change risks into their research and development projects in urban Africa.

Urban Vulnerability and Adaptation in Africa: \[\text{B. Smith. 2014-01-15} \]
Urban Vulnerability and Adaptation in Africa: Moving Beyond Standard Narratives to Better Address Vulnerability and Adaptation Challenges in African Cities focuses on the impacts of climate change on regions and their local communities. The book includes a section on climate science in practice. The book is addressed to graduate students, researchers and practitioners interested in enhancing their knowledge and skills in order to mitigate climate change risks into their research and development projects in urban Africa.
