Management information system - Wikipedia
A management information system (MIS) is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization. The study of the management information systems involves people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a management information system is

Management - Wikipedia
Management (or managing) is the administration of an organization, whether it is a business, a non-profit organization, or a government body. It is the art and science of managing resources. Management includes the activities of setting the strategy of an organization and coordinating the efforts of its employees (or of volunteers) to accomplish its objectives through the application of
